

RECYCLING GUIDE

for your home

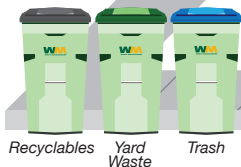

With your partnership, the City of Irvine can continue towards an environmentally-friendly future for generations to come.

Each year, our program helps Irvine residents recycle over 53 million pounds of waste that would otherwise go to the landfill.

Recycling is easy!

Use the **grey bin** for your recycling items: *metal, plastic, clean and dry paper, and glass.*

Use the **green bin** for your yard waste: *brush, leaves, grass, and tree trimmings.*

Put your bins at the curb on trash pickup day.

When you recycle, you are:

Creating a Cleaner Community

More recycling means less waste goes to local landfills.

Saving Money

You can save money by requesting one of the smaller waste bins.

Building a Greener Future

Recycling saves energy and conserves natural resources for future generations.

Contact Waste Management at **949-642-1191** to find out your scheduled pickup day, request an additional recycling cart free of charge, or for more information.

Thank you for doing your part to keep waste out of the landfill and help the City achieve our recycling goals.
