Chief Building Official

ELECTRICAL PRODUCT APPROVAL

REASON: The “third party” certification and test benefits everyone by helping to ensure the integrity and the safety of products in the market place.

CODE: 2019 California Electrical Code based on the 2017 National Electrical Code.

SECTION: 110-2 of the Code requires that all conductors and equipment be approved as defined in Article 100 and, as such, be acceptable to the authority having jurisdiction. Section 110-3 provides guidance for the judging of equipment and recognizes “listing or labeling” as a means to established suitability.

Approval of conductors and equipment is the responsibility of the inspection authority, and many such “approvals” are based on tests and listings of testing laboratories. The following laboratory testing facilities are recognized and accepted by the City of Irvine:

ARL	Applied Research Laboratories Miami, Florida	(305) 624-4800
¹ ASC	Engineering Services Richmond, CA	(510) 223-7891
BACL	Bay Area Compliance Laboratories Sunnyvale, California	(408) 732-9162

¹This certification will expire and the company removed from this list on July 1, 2021, unless documentation is presented to the City of Irvine showing this company’s certification has been renewed.
