# MOVING AT A SNAIL'S PACE IN GEOLOGIC TIME

Eric Stoner

Combining original photographs and artwork, journals, woodworking elements, vintage album covers and other mixed media, the complex and allegorical collage works by Orange County-based artist Eric Stoner have been in the making for more than a decade. Their autobiographical nature highlights the interconnectedness of events, people and places that have shaped the artist's life, while remaining open to multiple interpretations by the viewer. The work's surreal and highly detailed narratives follow in the tradition of Northern European masters like Hieronymus Bosch and Pieter Bruegel.
