## Spring Flower Prints

### *Supplies needed:*

- **Paint: yellow, red, green, and purple** (acrylic, tempera, or watercolor paint will work for this project)
- **Paint brush**
- **Water cup**
- **White paper**
- **Plastic zip-lock bag**
- **Scissors**
- **Q-tips** (optional)

## Step 1

- Use scissors to cut zip-lock bag into two plastic sheets. Note: The more bags you have, the more prints you will be able to make.

## Step 2

- Use a paint brush to paint flower onto the plastic sheet.

## Step 3

- Place the painted plastic sheet over the white paper (paint face down) and lightly rub over the painted design.

## Step 4

- Slowly lift up the painted plastic sheet. The image should have transferred onto the white paper.

## Step 5

- Use the other plastic sheet to repeat steps.
- *Tip: If you use washable paint, you can rinse and reuse the same sheet.*

- *Optional: Paint on the plastic sheet, then use a Q-tip to remove the paint that will create lines and details once you transfer (print) image on the white paper. Repeat steps 3 & 4.*

## Step 6

- Once print is complete, let it dry.
