# CONSTELLATION

OLGA LAH

Gallery 1

*Constellation*, an installation by Long Beach-based artist Olga Lah, transforms commonplace industrial materials and the interior of the Irvine Fine Arts Center Gallery 1 into a site ripe with experiential possibilities. Informed by and symbolic of a personal and collective haze, the installation draws upon a myriad of themes, questions, and sensibilities heightened by the increasingly speculative future.

For over a decade, Lah has established a body of work that builds upon and transforms facets of the architecture that houses it, considers viewers' physical and emotional response, and radically reimagines everyday materials and their perceived use value. Conceptually, *Constellation* exists in service of contemplation and renewed awareness: an experience that prompts viewers to reflect upon the not-so-distant past and dream of a time beyond the present.
