

LARRY AGRAN

Vice Mayor, City of Irvine

I ask for your vote to become Irvine's next Mayor.

Good leadership and citizen activism make a difference! Working together, we preserved 10,000 acres of open space; built beautiful community parks; and defeated the County's dangerous international airport plan.

Now we're building museums, restaurants, and the Veterans Memorial Park & Gardens at our Great Park. And we recently implemented my strategy to shut down Irvine's largest industrial polluter and replace it with a 700-acre nature preserve.

But we have more to do:

We must lower skyrocketing electricity prices by exiting the scandal-ridden Orange County Power Authority.

We must combat climate change by expanding Irvine's rooftop solar program, planting another 200,000 trees, and transitioning to greener transportation.

We must reject massive warehouses in residential areas and wild schemes to cram 57,000 additional houses and apartments into Irvine.

We must increase investments in public safety, childcare programs, school nurses, and school bus transportation.

I don't accept money from big corporations and out-of-town special interests trying to control our City Council. Please join our grassroots campaign for Mayor — LarryAgran.com — powered by neighborhood volunteers and small donations. Together, let's protect our quality of life and build an even brighter future for Irvine residents!

Thank you,
Larry Agran
