Re: CITADEL Project No. 1358.1101.0
Phase I Environmental Site Assessment Report
Barranca Channel Segment 6
Irvine, California 92614

Dear Mr. Reicher:

Enclosed please find Citadel EHS's Phase I Environmental Site Assessment Report for the above-referenced location.

The Phase I Environmental Site Assessment Report was conducted for UltraSystems Environmental, in accordance with Citadel's Proposal 1358.1101.P, dated February 6, 2024, and a mutually agreed upon scope of work.

If after your review, you have any questions or require additional information, please do not hesitate to telephone me at the Citadel Office in Glendale at (818) 246-2707.

Sincerely,
CITADEL EHS

Mark Drollinger, M.Eng., CSP
Principal, Engineering and Environmental Sciences

EXECUTIVE SUMMARY

Citadel EHS (Citadel) was contracted by UltraSystems Environmental (Client) to perform a Phase I Environmental Site Assessment (Phase I ESA) of the Barranca Channel Segment 6 of the Irvine Business Complex (IBC) Trail Study/Plan, in the City of Irvine, Orange County, California; hereinafter referred to as the "Site."

PROJECT INFORMATION

The Barranca Channel Segment 6 of the IBC Trail Study/Plan Project (Project) is located approximately 0.48 mile northeast of the Interstate 405 Freeway, locally referred to as the San Diego Freeway. The purpose of the Project is to construct an 11-foot wide (with two foot wide shoulders) multi-use trail along the Barranca Channel (Channel).

The Site is limited to 1.5 mile of the Channel, that extends south from Barranca Parkway towards Main Street and turns east near Main Street to its end at Jamboree Road. In this report, the Channel will be described in three sections where it intersects major roadways. The sections are described as follows:

- Section A is the north portion of the Channel located between Barranca Parkway and Alton Parkway and is approximately 0.48 mile in length.
- Section B is the central portion of the Channel located between Alton Parkway and McGaw Avenue and is approximately 0.23 mile in length.
- Section C is the south portion of the Channel located between McGaw Avenue and Jamboree Road and is approximately 0.58 mile in length.

The general Site vicinity is occupied by commercial, industrial, and residential properties. According to the U.S. Geological Survey (USGS) Tustin Quadrangle (7.5 Minute Series), dated 2022, the Site is at an elevation of approximately 41 feet above mean sea level (AMSL) and appears to slope gradually to the west.

Based on the linear aspect of the Site, the Phase I ESA focuses on properties along the Site that may adversely impact the vicinity of the construction areas and workers. The extent of the Phase I ESA includes properties approximately 100 feet from the Site boundaries although select properties located beyond the 100-foot radius were reviewed based on their potential environmental impact to the Site.

ENVIRONMENTAL DATABASES

As part of the Phase I ESA, Citadel utilized Environmental Data Resources Inc. (EDR) of Milford, Connecticut, as an information source for regulatory agency database records. Information from standard federal, state, county, and city environmental record sources was provided by ERS. The following summary of the database information is divided into four columns. The first column identifies the environmental database researched; the second column indicates the distance from the Site that was used for the research; the third column indicates if the Site was identified in the specified database; and the fourth column lists the number of listings identified on the database within the specified distance of the Site.

Database	Radius	Site Identified	No. of Listings Identified
National Priorities List	1 mile	No	0

Database	Radius	Site Identified	No. of Listings Identified
RCRA Corrective Action Treatment/Storage/Disposal (TSD) Facilities (CORRACTS)	1 mile	No	2
Delisted National Priorities List	1 mile	No	0
CERCLIS Sites	½ mile	No	0
CERCLIS No Further Remedial Action Planned (NFRAP) Sites	½ mile	No	0
RCRA Non-Corrective Action TSD Facilities	½ mile	No	2
State/Tribal Voluntary Cleanup Sites	½ mile	No	2
State/Tribal Leaking Registered Storage Tank Sites	½ mile	No	90
State/Tribal Brownfield Sites/CERCLIS Equivalent	1 mile	No	0
Historic CORTESE List	½ mile	No	42
State/Tribal Solid Waste Landfill Sites/Facilities	½ mile	No	0
Federal/State/Tribal Engineering Controls Registries	½ mile	No	0
Federal/State/Tribal Institutional Controls Registries	½ mile	No	0
RCRA Large Quantity Generators	¼ mile	No	8
RCRA Small Quantity Generators	¼ mile	No	43
RCRA Non Generators	¼ mile	No	79
State/Tribal Registered Storage Tank Sites	¼ mile	No	39
HIST UST	¼ mile	No	21
CA FID UST	¼ mile	No	10
SWEEPS UST	¼ mile	No	11
Facility Index System (FINDS)	Site	No	0
HAZNET	Site	No	0
Orphan	N/A	No	10

The following provides information on areas where there may be environmental concerns based on our environmental database and regulatory agency research.

SECTION A

The properties along the Site in this area are occupied by commercial and industrial properties. No environmental concerns were identified for Section A.

SECTION B

The properties along the Site in this area are occupied by commercial, industrial, and multi-family residential properties. A railway track is located along a portion of Section B. The listings

are not likely to represent a significant environmental concern with the exception of the following:

- The property located at 2525 McGaw Avenue is occupied by a medical supplies manufacturer with large quantities of hazardous waste generation. This property has been occupied as an industrial property since the 1970s. A railway spur is located at the property along the Site. Chemicals and herbicides are commonly used to treat railroad ties. Based on the long-term industrial use and proximity to railway tracks, this property represents an environmental concern to the Site.

The railway track along a portion of Section B represents an environmental concern.

SECTION C

The properties along the Site in this area are occupied by commercial, industrial, and multi-family residential properties, and a hotel property. A railway track is located along a portion of Section C. The listings are not likely to represent a significant environmental concern with the exception of the following:

- The property located at 17461 Derian Avenue was formerly occupied by a pesticide packaging facility. This property adjoins the Site to the east. Soil, groundwater, and soil vapor contamination has been identified migrating from the property towards the west, directly across the Channel. The case remains open and represents an environmental concern to the Site.

The railway track along a portion of Section C represents an environmental concern.

RECOGNIZED ENVIRONMENTAL CONDITIONS

According to American Society for Testing and Materials (ASTM) Standard of Practice E1527-21, recognized environmental conditions (REC) fall under three specific categories when evaluating a site or properties within the site vicinity. These categories are defined below.

A recognized environmental condition, or REC, means the (1) presence of any hazardous substances or petroleum products in, on, or at the subject property due to a release to the environment; (2) the likely presence of hazardous substances or petroleum products in, on, or at the subject property due to a release or likely release to the environment; or (3) the presence of hazardous substances or petroleum products in, on, or at the subject property under conditions that pose a material threat of a future release to the environment. De minimis conditions are not recognized environmental conditions.

A controlled recognized environmental condition, or CREC, is a recognized environmental condition affecting the subject property that has been addressed to the satisfaction of the applicable regulatory authority or authorities with hazardous substances or petroleum products allowed to remain in place subject to implementation of required controls (for example, activity and use limitations or other property use limitations).

An historical recognized environmental condition, or HREC, is a previous release of hazardous substances or petroleum products affecting the subject property that has been addressed to the satisfaction of the applicable regulatory authority or authorities and meeting unrestricted use criteria established by the applicable regulatory authority or authorities without subjecting the subject property to any controls (for example, activity and use limitations or other property use limitations).

According to ASTM E2600-15, the goal of conducting a vapor encroachment screening on a parcel of property is to identify a vapor encroachment condition (VEC), which is the presence or likely presence of chemicals of concern vapors in the subsurface of the target property caused by the release of vapors from contaminated soil or groundwater or both either on or near the target property as identified by Tier 1 or Tier 2 procedures. The purpose of Tier 1 is to conduct a screen using Phase I ESA-type information to determine if a VEC exists at the target property. If the Tier 1 screen cannot rule out the possibility of a VEC existing at the target property, then a Tier 2 screen can be conducted. Tier 2 applies numeric screening criteria to existing or newly collected soil, soil gas, and/or groundwater testing results to evaluate whether a VEC can be ruled out. Tier 2 has two data collective components: non-invasive and invasive.

Based on a review of historical and present records, and Site reconnaissance, Citadel believes that sufficient information was collected and evaluated for the Site to determine if a REC, HREC, CREC, or a de minimis condition exists. Based on our review, reported release incidents that would represent RECs in connection with the Site or a source of a release that would be likely to contribute to a VEC was identified. Citadel identified the following environmental concerns:

- Railway tracks are located along portions of Sections B and C. The close proximity of railway tracks may represent a REC due to chemicals and herbicides commonly used to treat railroad ties.
- The property located at 2525 McGaw Avenue has been occupied as an industrial property since the 1970s. A railway spur is located at the property along the Site. Based on the long-term industrial use and proximity to railway tracks, this property represents a REC.
- The property located at 17461 Derian Avenue was formerly occupied by a pesticide packaging facility. Soil, groundwater, and soil vapor contamination has been identified at this property east of the Site and migrating to the west, directly across the Channel. The migration of contaminated plumes from this property across the Site represents a REC.

No evidence for designating the Site as a HREC or CREC from reviews of historic documents and present Site conditions was found.

ESA SHELF LIFE

Date of ESA Report: May 20, 2024

Date of Site Inspection: March 15, 2024

Date Interview was performed: March 15, 2024

Date Records Review was performed: March 13, 2024

Date Lien Search was performed: N/A

1.0 INTRODUCTION

Citadel EHS (Citadel) was contracted by UltraSystems Environmental (Client) to perform a Phase I Environmental Site Assessment (Phase I ESA) of the Barranca Channel Segment 6 of the Irvine Business Complex (IBC) Trail Study/Plan, in the City of Irvine, Orange County, California; hereinafter referred to as the "Site."

1.1 PURPOSE

The purpose of the Phase I ESA was to review past and present land use practices and to evaluate the presence, or likely presence, of any hazardous substances or petroleum products that have been discharged into the property's structure, ground, groundwater, or surface water. This qualitative assessment was accomplished by review of current and readily available information regarding past and current land use for indications of the manufacture, generation, use, storage and/or disposal of hazardous substances at the Site. A Site visit was also conducted to observe existing Site conditions. This report provides the results of the Phase I ESA performed.

1.2 INVOLVED PARTIES

The involved party(s) in this study, to the best of our knowledge, is UltraSystems Environmental.

Citadel understands that this Phase I ESA is being requested in conjunction with due diligence activities by UltraSystems Environmental. Citadel recognizes that this report is to be used exclusively by UltraSystems Environmental and its successors, lenders, and assigns. It is a report upon which UltraSystems Environmental and its successors, lenders, and assigns, can rely.

This assessment and report were prepared on behalf of and for the exclusive use of UltraSystems Environmental, their lenders and assigns (Client) solely for its use and reliance, subject to the terms and conditions agreed upon between Citadel and the Client.

1.3 SCOPE OF SERVICES

This Phase I ESA was conducted in accordance with the American Society for Testing and Materials (ASTM) Standard of Practice E1527-21 and the standards of care and diligence normally practiced by recognized consulting firms in performing services of a similar nature.

The scope of services for this assessment consisted of the following:

- Performed a Site inspection to verify current Site conditions, and check for visible evidence of previously disposed and/or currently present hazardous waste, surface contamination, underground and above ground storage tanks (USTs/ASTs), suspect polychlorinated biphenyls (PCBs), and other potential environmental hazards.
- Conducted a visual survey of the adjacent properties and the immediate vicinity to determine if any nearby sites posed a significant environmental threat to the Site.
- Reviewed currently and readily available documents, including maps, aerial photographs, governmental databases of known hazardous waste sites and underground tanks, other consultant reports (if any), fire insurance maps, and other accessible records.

- Reviewed results from a search of available current land title records for environmental cleanup liens and other activity and use limitations, such as engineering controls and institutional controls.
- Consulted with appropriate governmental agencies having jurisdiction relative to past history of the property, complaints or incidents in the immediate area, and permits that may have been issued.
- Prepared a Phase I report, inclusive of our findings and recommendations, with applicable illustrations and documentation.

The scope of services outlined above is generally considered sufficient to properly assess the Site based on the data search, reasonably ascertainable documents, and Site inspection. Based on the linear aspect of the Site, the Phase I ESA focuses on properties along the Site that may adversely impact the vicinity of the construction areas and workers. The extent of the Phase I ESA includes properties approximately 100 feet from the Site boundaries although select properties located beyond the 100-foot radius were reviewed based on their potential environmental impact to the Site.

2.0 GENERAL SITE CHARACTERISTICS

2.1 LOCATION

The Barranca Channel Segment 6 of the IBC Trail Study/Plan Project (Project) is located approximately 0.48 mile northeast of the Interstate 405 Freeway, locally referred to as the San Diego Freeway. The purpose of the Project is to construct an 11-foot wide (with two foot wide shoulders) multi-use trail along the Barranca Channel (Channel).

The Site is limited to 1.5 mile of the Channel, that extends south from Barranca Parkway towards Main Street and turns east near Main Street to its end at Jamboree Road. In this report, the Channel will be described in three sections where it intersects major roadways. The sections are described as follows:

- Section A is the north portion of the Channel located between Barranca Parkway and Alton Parkway and is approximately 0.48 mile in length. Section A begins at approximate coordinates 33° 41' 51.5" North Latitude and 117° 49' 55.9" West Longitude and ends at the beginning of Section B.
- Section B is the central portion of the Channel located between Alton Parkway and McGaw Avenue and is approximately 0.23 mile in length. Section B begins at approximately 33° 41' 20.2" North Latitude and 117° 50' 13.0" West Longitude and ends at the beginning of Section C.
- Section C is the south portion of the Channel located between McGaw Avenue and Jamboree Road and is approximately 0.58 mile in length. Section C begins at approximately 33° 41' 20.2" North Latitude and 117° 50' 23.1" West Longitude and ends at approximately 33° 40' 56.9" North Latitude and 117° 50' 18.1" West Longitude.

The general Site vicinity is occupied by commercial, industrial, and residential properties. According to the U.S. Geological Survey (USGS) Tustin Quadrangle (7.5 Minute Series), dated 2022, the Site is at an elevation of approximately 41 feet above mean sea level (AMSL) and appears to slope gradually to the west.

A Site Location Map identified as Figure 1 is included in Appendix A.

2.2 SITE DESCRIPTION

According to the Orange County Assessor's Parcel Maps, the Site is comprised of three parcels of land with no legal Assessor's Parcel Numbers (APNs). The Site encompasses approximately 13.43 acres of land.

The Site consists of a graded but unpaved drainage channel. The Channel is contiguous and flows beneath roadways from north to south, terminating at the San Diego Creek and ultimately flowing to Newport Bay and the Pacific Ocean. These roadways include Alton Parkway, McGaw Avenue, and the Burlington Northern Santa Fe (BNSF) railway. The Channel appeared developed by 1972.

The 100-foot radius of Section A is generally developed with commercial and industrial properties. The 100-foot radius of Sections B and C are generally developed with commercial, industrial, and residential properties.

The BNSF railway tracks intersect Section C and extend along the east boundaries of Sections B and C, terminating at 2525 McGaw Avenue. Access to the Site is from the areas where it intersects with roadways. Each section is enclosed by locked chain-link fences to prevent pedestrian traffic. In general, the Site appeared to be well maintained.

A Site Plan is included as Figure 2 in Appendix A. Select photographs of the Site and vicinity is included as Appendix B.

2.3 ADJACENT PROPERTIES

Refer to Section 4.1 for adjacent properties along the Site.

2.4 UTILITIES

Utilities services are not provided to the Site.

3.0 ENVIRONMENTAL SETTING

3.1 PHYSICAL SITE CHARACTERISTICS

Based upon the North American Datum (NAD) of 1983, the Site is at an elevation of approximately 41 feet AMSL.

3.2 GEOLOGIC CONDITIONS AND SOILS

The Site is identified on the geologic map of Orange County, California (Morton and Miller, 1981) as being Holocene aged alluvium and colluvium (Qac). The United States Department of Agriculture (USDA) Natural Resources Conservation Service (NRCS) National Cooperative Soil Survey identifies the Site soils as Chino and Omni complex. The Chino soils are described as

somewhat poorly drained silty and sandy clay loam with low runoff. The Omni soils are described as poorly drained clay and silty clay.

3.3 GROUNDWATER/HYDROGEOLOGICAL CONDITIONS

The Site is located within the Coastal Plain of Orange County Groundwater Basin, which underlies a coastal alluvial plain in the northwestern portion of Orange County. The basin is bounded by consolidated rocks of the Puente and Chino Hills to the north; the Santa Ana Mountains to the east; and the San Joaquin Hills to the south. The basin is bounded by the Pacific Ocean to the southwest and a low topographic divide approximated by the Orange County – Los Angeles County line to the northwest. Recharge to the basin is derived from percolation of Santa Ana River flow, infiltration of precipitation, and injection into wells.

Citadel reviewed the GeoTracker database of sites that have had releases of fuels, solvents, or other material into the soil and groundwater to obtain information regarding depth to first ground water in the Site vicinity. This database is maintained by the California Regional Water Quality Control Board. Information was obtained from this database for the Former Great Lakes Chemical Corp., located at 17641 Derian Avenue, adjoining Section C to the east. According to the Semi-Annual Groundwater Monitoring Report – Second Period 2023 and dated October 24, 2023, depth to groundwater was measured between approximately between 18 and 25 feet below ground surface (bgs) and groundwater flow was determined to be to the west-southwest.

4.0 SITE RECONNAISSANCE

Citadel representative Mr. Kyle Johnston conducted the Phase I ESA reconnaissance on March 15, 2024. Mr. Johnston was unaccompanied and authorized to access the Site by Mr. Amir Ainechi, a representative of the City of Irvine. The Site reconnaissance consisted of an inspection of the Site and a perimeter survey of the surrounding properties. Ms. Shirley Lee served as the Project Manager and reviewed this Phase I ESA. Findings from the Site inspection, research and perimeter survey are presented below.

4.1 SITE RECONNAISSANCE FINDINGS

The following table provides information regarding adjoining/adjacent properties of interest or potential environmental concern within the 100-foot radius of the Site during the Site reconnaissance.

5.0 SITE HISTORY

The purpose of the records review is to obtain and review reasonably ascertainable/standard sources that will help identify recognized environmental conditions in connection with the property. Reasonably ascertainable records from standard sources is (1) information that is publicly available, (2) information that is obtainable from its source within reasonable time and cost constraints, and (3) information that is practically reviewable.

Reasonable time and cost means that the information will be provided by the source within 20 calendar days of receiving a written, telephone, or in-person request at no more than a nominal cost intended to cover the source's cost of retrieving and duplicating the information. Information that can only be reviewed by a visit to the source is reasonably ascertainable if the visit is permitted by the source within 20 days of request.

To investigate the history of the Site, Citadel reviewed select historic aerial photographs, building permits, city directories, and Sanborn Fire Insurance Maps provided by Environmental Data Resources Inc. (EDR). In addition, Citadel reviewed client-supplied information, and oil and gas maps, and Citadel interviewed selected individuals regarding historic Site use. Citadel's reviews of these reports and interviews are discussed below.

5.1 HISTORICAL AERIAL PHOTOGRAPHS

Historical aerial photographs of the Site and vicinity were obtained from EDR to ascertain historical land uses and to identify any evidence of hazardous material generation or storage. Below are brief descriptions of observations made from the aerial photographs of the Site and vicinity.

Section A

Dates(s)	Site Description
1938, 1946, 1952	The Site and surrounding areas appear to be undeveloped land.
1963	Several roads appear developed in the south portion of Section A. The surrounding area remains relatively unchanged.
1972	The current Channel appears developed. Barranca Parkway and Alton Parkway appear developed.
1977	Many of the current commercial/light industrial structures appear developed.
1985, 1989, 1994	Several of the previously identified structures appear to have been expanded to their current configurations. Several more of the current commercial structures appear developed.
2002, 2009, 2012, 2016, 2020	The properties along the Site appear developed in their current configurations.

Section B

Dates(s)	Site Description
1938, 1946, 1952	The Site and surrounding areas appear to be undeveloped land.
1963	Two roads appear developed to the north and south of Section B.
1972	The current Channel appears developed. Alton Parkway and McGaw Avenue appear developed.
1977	Two of the current commercial/light industrial structures and a third light industrial structure appear developed to the east and west.
1985, 1989, 1994, 2002	An additional commercial structure appears developed to the west.
2009	The remaining current commercial structure appears developed to the east.
2012	One of the previously identified light industrial structures to the west appears to have been demolished.
2016	The current multi-family residential structure appears to be under construction.
2020	The current multi-family residential structures appear developed.

Section C

Dates(s)	Site Description
1938, 1946, 1952	The Site and surrounding areas appear to be undeveloped land. An unimproved road appears to intersect the south portion of Section C.
1963	A road appears developed in the north portion of Section C.
1972	The current Channel appears developed. McGaw Avenue appears developed. Two commercial structures appear developed. Main Street appears developed further south.
1977	Jamboree Road appears developed. Several of the current commercial/light industrial structures appear developed.
1985	More of the current commercial and light industrial structures appear developed.
1989, 1994	Two of the current multi-family residential structures appear developed along with the current hotel structure, multi-tenant commercial office structure, and parking garage.
2002	Two of the previously identified commercial structures appear to have been expanded to current configuration.
2009, 2012, 2016, 2020	The remaining current commercial structure appears developed and one of the previously identified commercial structures appears to have been demolished and replaced with the current multi-family residential structure.

Copies of the Aerial Photographs provided by EDR can be found in Appendix C.

5.2 HISTORIC BUILDING PERMITS

Based on the extensive Site vicinity and that no buildings are part of the Site, no building permits were requested or reviewed during this Phase I ESA.

5.3 HISTORICAL FIRE INSURANCE MAPS

Citadel requested that EDR review its collection of Sanborn Fire Insurance Maps for potential coverage of the Site and vicinity. Sanborn Map coverage was not available for the Site.

A copy of the EDR Sanborn Map Report is included as Appendix D.

5.4 CITY PARCEL PROFILE REPORT

A parcel profile report was not available for the Site.

5.5 HISTORICAL CITY DIRECTORIES

Based on the extensive Site vicinity, no city directories were provided for review during this Phase I ESA.

A copy of the EDR Sanborn Map Report is included as Appendix E

5.6 CLIENT-SUPPLIED ENVIRONMENTAL INFORMATION

No prior reports or relevant documentation was provided to Citadel.

5.7 HISTORICAL TOPOGRAPHIC MAPS

Historical topographic maps were provided by EDR in order to identify natural features and changes in development over a long period of time. The topographic maps provides the user with a regional view of changes to the Site and vicinity that other historical databases such as aerial photographs may not provide. Below are brief descriptions of observations made from the topographic maps of the Site and vicinity.

Section A

Dates(s)	Site Description
1896, 1901, 1902	The Site and surrounding area appear as undeveloped land
1932, 1935	The Mickleson Vacuum Tube appears developed further west and intermittent streams appear to the east. Properties to the north appear to be part of the Twenty Ranch Gun Club.
1942	The previously identified vacuum tube appears to have been replaced with a stream. An additional stream appears to cross Section A.
1948, 1950	Barranca Parkway appears developed as Barranca Road.
1965	The Site and surrounding area appear to be developed with duck ponds.
1972	The duck ponds are no longer shown. The current Channel and Alton Parkway appear developed.
1981	Several commercial/light industrial structures appear developed.
2012, 2015, 2018, 2022	Structures are not depicted on this map.

Section B

Dates(s)	Site Description
1896, 1901, 1902	The Site and surrounding area appear as undeveloped land
1932, 1935	The Mickleson Vacuum Tube appears developed further west and intermittent streams appear to the east.

Dates(s)	Site Description
1942, 1948, 1950	The previously identified vacuum tube appears to have been replaced with a stream.
1965	The Site and surrounding area appear to be developed with duck ponds.
1972	The duck ponds are no longer shown. The current Channel, railway tracks, Alton Parkway, and McGaw Avenue appear developed.
1981	Several commercial/light industrial structures appear developed.
2012, 2015, 2018, 2022	Structures are not depicted on this map.

Section C

Dates(s)	Site Description
1896, 1901, 1902	The Site and surrounding area appear as undeveloped land.
1932, 1935	An intermittent stream appears crossing Section C; additional intermittent streams appear to the east and south. The Mickleson Vacuum Tube appears developed further west. The Site and adjacent properties to the southwest and east appear to be part of the Sprig Gun Club and Aliso Gun Club, respectively.
1942, 1948, 1950	The previously identified vacuum tube appears to have been replaced with a stream.
1965	The Site and surrounding area appear to be developed with duck ponds.
1972	The duck ponds are no longer shown. The current Channel, railway tracks, and McGaw Avenue appear developed. Two commercial structures appear developed along the Site. Main Street appears developed further south.
1981	Jamboree Road appears developed. Several commercial/light industrial structures appear developed.
2012, 2015, 2018, 2022	Structures are not depicted on this map.

Copies of the historical topographic maps provided by EDR are included as Appendix F.

5.8 HISTORIC OIL AND GAS MAPS

Citadel reviewed information available on-line through the California Department of Conservation's website. The Geological Energy Management Division (CalGEM) Online Mapping System (COMS) shows that there is an oil well approximately 450 feet west of Section C of the Site. The oil well is identified by API 0405920641. According to COMS, the well operator for the well is listed as Chevron U.S.A. Inc. and the status for the well is plugged. The well was drilled to a depth of 9,710 feet in May 1973 and was abandoned in June 1973.

5.9 INTERVIEWS

Based on the extensive Site vicinity, no interviews were performed during this Phase I ESA.

Citadel submitted a User Questionnaire to UltraSystems Environmental. The completed User Questionnaire was not provided to Citadel at the time of this report. A copy of Citadel's User Questionnaire can be found in Appendix G.

5.10 ENVIRONMENTAL LIEN

Based on the extensive Site vicinity and lack of APNs, no environmental lien search was requested or reviewed during this Phase I ESA.

6.0 REGULATORY AGENCY REVIEW

6.1 DATABASE REVIEW

As part of the Phase I ESA, Citadel utilized EDR of Milford, Connecticut, as an information source for regulatory agency database records.

The following summary of the database information is divided into five columns. The first column identifies the environmental database researched; the second column indicates the distance from the Site that was used for the research; the third column indicates if the Site was identified in the specified database; the fourth column lists the number of listings identified on the database within the specified distance of the Site; and the fifth column indicates if the sites identified are potential environmental concerns to the Site.

Although locations of the orphan sites are frequently unknown, Citadel attempts to evaluate the potential adverse environmental impact that these facilities may have on the Site. This evaluation consists of reviewing street names in an effort to learn whether the street on which the Site is located lies within the search distance of the subject property, a drive-by view of surrounding properties during the Site visit, and evaluating the Site type and information provided by government agencies. The orphan sites included in the following table are those Citadel identified as potentially located within the identified search distance.

Database	Radius	Site Identified	No. of Listings Identified	Potential Environmental Concern to the Site
National Priorities List	1 mile	No	0	
RCRA Corrective Action Treatment/Storage/Disposal (TSD) Facilities (CORRACTS)	1 mile	No	2	No, see discussion below
Delisted National Priorities List	1 mile	No	0	
CERCLIS Sites	½ mile	No	0	
CERCLIS No Further Remedial Action Planned (NFRAP) Sites	½ mile	No	0	No, see discussion below
RCRA Non-Corrective Action TSD Facilities	½ mile	No	2	No, see discussion below
State/Tribal Voluntary Cleanup Sites	½ mile	No	2	No, see discussion below
State/Tribal Leaking Registered Storage Tank Sites	½ mile	No	90	Yes, see discussion below
State/Tribal Brownfield Sites/CERCLIS Equivalent	1 mile	No	0	
Historic CORTESE List	½ mile	No	42	No, see discussion below
State/Tribal Solid Waste Landfill Sites/Facilities	½ mile	No	0	

Database	Radius	Site Identified	No. of Listings Identified	Potential Environmental Concern to the Site
Federal/State/Tribal Engineering Controls Registries	½ mile	No	0	
Federal/State/Tribal Institutional Controls Registries	½ mile	No	0	
RCRA Large Quantity Generators	¼ mile	No	8	No, see discussion below
RCRA Small Quantity Generators	¼ mile	No	43	No, see discussion below
RCRA Non Generators	¼ mile	No	79	No, see discussion below
State/Tribal Registered Storage Tank Sites	¼ mile	No	39	No, see discussion below
HIST UST	¼ mile	No	21	No, see discussion below
CA FID UST	¼ mile	No	10	No, see discussion below
SWEEPS UST	¼ mile	No	11	No, see discussion below
Facility Index System (FINDS)	Site	No	0	
HAZNET	Site	No	0	
Orphan	N/A	No	10	No

The following summary of the database information provides brief description of the facility name; the databases the facility was identified in; location of the property to the Site; and whether the facility is a concern to the Site. Based on the linear aspect of the Site, this Phase I ESA focuses on properties along the Site that may adversely impact the vicinity of the construction areas and workers. The extent of the Phase I ESA includes properties approximately 100 feet of the Site boundaries; however, select properties located beyond the 100-foot radius were reviewed based on their potential impact to the Site. The full report provided by EDR and reviewed by Citadel can be found in Appendix H.

			under regulatory oversight, lack of groundwater contamination, and remedial efforts, this property is not expected to represent a significant environmental concern.
NH Research	RCRA NONGEN/NLR, RCRA SQG, FINDS ECHO	16601 Hale Avenue – East of the Site	This property was identified as a RCRA SQG in 1987 and a RCRA Non-Generator in 2022 and 2023. No violations were reported. This property is not expected to represent a significant environmental concern.
COM Products Inc., Newport Meat Southern California	RCRA NONGEN/NLR, RCRA-SQG, US AIRS	16691 Hale Avenue – East of the Site	This property was identified as a RCRA SQG in 1986 and a Non-Generator in 2011. The property was identified on the US Aerometric Information Retrieval System (AIRS) for the stratospheric ozone protection program with compliance monitoring. No violations were reported. This property is not expected to represent a significant environmental concern.
Royal Adhesives and Sealants DBA Bacon Adhesives, Bacon Acquisitions LLC	RCRA NONGEN/NLR, RCRA-SQG, CA CERS HAZWASTE, FINDS, ECHO, CA NPDEA, CA WDS, CA CIWQS, CA CERS	16731 Hale Avenue – East of the Site	This property was identified as a Non-Generator in 2017 and a RCRA-SQG in 2019. The Bacon Industries Inc. facility was identified as a hazardous waste generator and industrial stormwater facility that treats and disposes liquid or semisolid waste. Violations reported on the California Environmental Reporting System (CERS) database include various paperwork violations, and failure to label waste containers. Violations were later returned to compliance. This property is not expected to represent a significant environmental concern.
Super Color Digital	CA CERS HAZWASTE, CA HWTS, CA HAZNET, CA CERS, RCRA-SQG, FINDS, ECHO	16761 Hale Avenue – East of the Site	This property was identified as a chemical storage facility, hazardous waste generator, and a RCRA-SQG in 2012 generating spent nonhalogenated solvents. Empty containers less than 30-gallons, other organic solids, and unspecified organic liquid mixture were generated between 2013 and 2014. No violations were reported. This property is not expected to represent a significant environmental concern.
The Baldwin	CA UST, CA SWEEPS UST,	16811 Hale Avenue	This property was identified on

FACILITY NAME	DATABASE(S)	LOCATION	COMMENTS
Company, Baldwin Fleet	CA FID UST	- East of the Site	historical UST databases with two 10,000-gallon gasoline USTs and one 500-gallon petroleum UST. No releases have been reported. This property is not expected to represent a significant environmental concern.
Berteia Corp Logistics, Parker Hannifin Corp	RCRA-SQG, FINDS, CA AST, CA CERS HAZWASTE, CA CERS TANKS, CA EMI, CA CERS	16666 Von Karman Avenue – West of the Site	This property was identified as a hazardous waste generator, industrial storm water facility, and RCRA-SQG in 2013. Waste generated included ignitable waste, corrosive waste, reactive waste, metals, methyl ethyl ketone, and spent nonhalogenated solvents. Violations reported included minor paperwork violations, which have been returned to compliance. A 1,320 aboveground storage tank (AST) with unknown contents is located at the property. No release has been reported. This property is not expected to represent a significant environmental concern.
Chromatic Productions Inc., Enthone Inc., Shiple Company Inc., Technica USA	RCRA NONGEN/NLR, RCRA-LQG, CA LUST, CA HIST UST, FINDS, ECHO, CA CORTESE, CA EMI, CA CIWQS, CA CERS, UST FINDER RELEASE, CA ENVIROSTOR, CA CHMIRS, CA HIST CORTESE, CA CERS, PFAS ECHO, RCRA-SQG	16782 Von Karman Avenue – West of the Site	<p>This property was identified as a RCRA-SQG and a RCRA Large Quantity generator (LQG) in 2005 and 2006, respectively. Waste generated included ignitable waste, corrosive waste, reactive waste, metals, spent nonhalogenated solvents, waste treatment sludges, and volatile organic compounds (VOCs).</p> <p>An unauthorized release of copper and solvents impacting groundwater was reported in June 1987, during removal of eight USTs from a metal fabrication and manufacturing facility. Since the VOC concentrations detected in groundwater were below levels of regulatory concern, the OCHCA issued a closure letter in August 1990. A subsurface investigation in 2001 identified copper in soil and groundwater from on-site discharges. Remedial efforts included the removal of one 4,500-gallon clarifier, excavation of approximately 210 tons of contaminated soil, and extraction of approximately 4,100 gallons of contaminated groundwater. The</p>

FACILITY NAME	DATABASE(S)	LOCATION	COMMENTS
			OCHCA provided regulatory oversight; and determined that the property did not appear to have a large plume of significantly affected groundwater and therefore did not pose a threat to the surrounding water quality. Residual soil and groundwater contamination was left in place. The OCHCA issued case closure on June 28, 2006. While residual contamination was left in place, the former clarifier was located approximately 500 feet northwest of the Site. Based on the distance, the former release is not expected to represent a significant environmental concern to the Site.

SECTION B

FACILITY NAME	DATABASE(S)	LOCATION	COMMENTS
Marshall Aluminum	UST FINDER RELEASE, CA LUST, CA CORTESE, CA HIST CORTESE, CA CERS	2206 Alton Parkway – West of the Site	This property was identified as a LUST cleanup site. An unauthorized release of diesel fuel impacting groundwater was discovered in January 1988. The OCHCA provided regulatory oversight and closed the case on April 9, 1990. Based on case closure under regulatory oversight, this former release is not expected to represent a significant environmental concern.
Packard Hughes Interconnect, Hughes Aircraft Co	CA AST, SEMS-ARCHIVE, CORRACTS, CA ENVIROSTOR, CA LUST, CA CPS-SLIC, CA SWEEPS UST, CA HIST UST, CA FID UST, RCRA NONGEN/NLR, FINDS, ECHO, CA CORTESE, CA EMI, CA HIST CORTESE, CA HWP, CA HWTS, CA HAZNET, CA WDS, CA CIWQS, CA CERS, UST FINDER RELEASE	17150 Von Karman Avenue – West of the Site	This property was identified on several databases and was previously utilized to manufacture interconnection products for aerospace and military industries and was previously occupied by a 157,000 square foot manufacturing facility. Manufacturing activities included plating lines, painting booths, degreasing areas, and a cooling tower. Chemical storage areas, USTs, a chemical storage building, a wastewater treatment and recycling area, a material salvage building, and storage shed were also formerly located on the property. Investigations between 2005 and 2007 identified the presence of VOCs and metals in soil with VOCs also present in

SECTION C

FACILITY NAME	DATABASE(S)	LOCATION	COMMENTS
Hughes Aircraft Company	RCRA-SQG, FINDS, ECHO, CA HWTS, CA HAZNET	2362 McGaw Avenue – West of the Site	This property was identified as a RCRA-SQG in 1993. Waste generated included hydrocarbon solvents and asbestos containing waste. No violations were reported. This property is not expected to represent a significant environmental concern.
Parker Hannifin, Nyala Screen Printing Inc., Irvine Properties	UST FINDER RELEASE, RCRA-SQG, FINDS, ECHO, CA LUST, CA CPS-SLIC, CA UST, CA ORANGE CO. INDUSTRIAL SITE, CA CORTESE, CA CERS	17352 Von Karman Avenue – West of the Site	This property was identified on multiple databases including as a RCRA-SQG in 1995; no violations were reported. Multiple release cases are associated with the property involving unauthorized releases of gasoline impacting soil. Both cases were overseen by the OCHCA. The first case was closed on January 26, 1993, and the second case was closed on June 12, 2008. Based on case closure under regulatory oversight, this property is not expected to represent a significant environmental concern.
Amazon Data Services, Inc., Latisys – Irvine, Zayo Group Holdings Inc.	RCRA NONGEN/NLR, CA AST, RCRA-SQG	17400 Von Karman Avenue – West of the Site	This property was identified as a RCRA Non-Generator in 2020 and a RCRA-SQG in 2023. Waste generated included ignitable waste, corrosive waste, metals, and spent nonhalogenated solvents. An AST is associated with the property. No release has been reported. This property is not expected to represent a significant

FACILITY NAME	DATABASE(S)	LOCATION	COMMENTS
Tomorrows Look Inc., Nayla Screen Printing Inc.,	RCRA NONGEN/NLR, RCRA-SQG, FINDS, ECHO, CA CERS HAZWASTE, CA HWTS, CA HAZNET, CA CERS	17462 Von Karman Avenue – West of the Site	environmental concern. This property was identified on multiple databases as a hazardous waste generator, RCRA-SQG in 2007, and a RCRA Non-Generator in 2011. Waste generated included ignitable waste, tetrachloroethylene (PCE), spent halogenated solvents, unspecified solvent mixture, and off-specification aged or surplus organics. No violations were reported. This property is not expected to represent a significant environmental concern.
Metlife Century Center III, Control Components	UST FINDER RELEASE, CA LUST, CA CPS-SLIC, CA CORTESE, CA HIST CORTESE, CA CERS, RCRA-SQG, FINDS, ECHO, CA EMI, CA HWTS, CA HAZNET	2567 Main Street – South of the Site	This property was identified on multiple databases. The property was historically occupied by a large industrial building used to manufacture pumps and valves. An unauthorized release of waste oil and cutting oil was discovered during the removal of a 2,000-gallon waste oil/cutting oil UST in 1987. The OCHCA referred the case to the SARWQCB in 1996 for oversight of groundwater cleanup activities; however, no further action was required for the UST. Soil, soil vapor, and groundwater samples were collected from 30 locations in 1999, identifying elevated concentrations of trichloroethylene (TCE) in groundwater. Approximately 9,792 cubic yards of contaminated soil was excavated from the property in 2003. Groundwater at the property was treated with repeated injections of potassium permanganate into shallow groundwater. The OCHCA issues a no further action letter on August 1, 2011, stating that off-site downgradient areas did not show evidence of significant VOC migration and the property did not appear to represent a threat to the beneficial uses of groundwater. Although not required, a vapor barrier was installed during redevelopment of the property with the current apartment complex by 2009. Based on closure under regulatory oversight and subsequent redevelopment for

FACILITY NAME	DATABASE(S)	LOCATION	COMMENTS
			residential use, this former release is not expected to represent a significant environmental concern.
Century Center, Metropolitan Life Insurance Co.,	CA SWEEPS UST, UST FINDER, CA UST, CA CERS TANKS, CA HWTS, CA HAZNET, CA CERS	2601 Main Street – South of the Site	This property was identified on multiple databases. One 2,000-gallon diesel fuel UST was installed in 1985. Waste generated included waste and mixed oil in 1994. Violations included minor paperwork violations, which have returned to compliance. This property is not expected to represent a significant environmental concern.
The DOT Printer	RCRA-LQG, CA CERS HAZWASTE, CA EMI, CA NPDES, CA CIWQS, CA CERS	2424 McGaw Avenue – East of the Site	This property was identified on multiple databases including as a hazardous waste generator and a RCRA LQG in 1990. Violations included minor paperwork violations, failure to dispose of hazardous waste within the allotted amount of time, and failure to properly label hazardous waste; violations have returned to compliance. This listing is not expected to represent a significant environmental concern.
Irvine Company Office Properties, Royalty Carpet Mills Inc.	RCRA NONGEN/NLR, CA SWEEPS UST	17353 Derian Avenue – East of the Site	This property was identified as a RCRA Non-Generator in 2022. One 12,000-gallon diesel fuel UST and one 6,000-gallon gasoline UST were installed at the property in 1988. Due to the lack of evidence of documented spills or leaks, this property is not expected to represent a significant environmental concern.
Eurofins Calscience, GW Cleanup – Irvine, Derian, Great Lakes Chemical Corp, Air Products and Chemicals, EM Lab P&K Irvine	RCRA-LQG, CA ENVIROSTOR, CA CPS-SLIC, CA ORANGE CO. INDUSTRIAL SITE, CA CORTESE, CA ENF, CA HIST CORTESE, CA CIWQS, CA CERS, CA LUST, CA HWP, CORRACTS, RCRA-TSDF, RCRA SQG, FINDS, ECHO, RCRA NONGEN/NLR	17461 Derian Avenue – East of the Site	This property was identified as a treatment, storage, and disposal facility in 2001, a RCRA Non Generator in 2013 and 2019, and a RCRA-LQG in 2022. The property was previously occupied by a pesticide packaging and distribution facility from 1973 to 1982. VOCs have been detected in soil and groundwater. Active remediation for the removal of VOCs from soil and groundwater occurred from the mid 1980s until February 2018. A soil vapor extraction system operated at the property from 2000 to 2003 and groundwater extraction and treatment occurred from 2000 to

FACILITY NAME	DATABASE(S)	LOCATION	COMMENTS
			<p>2018. The most recent soil vapor investigation from the second period of 2023 identified 1,2,3-trichloropropane (1,2,3-TCP), ethylene dibromide (EDB), 1,2-dichloropropane (1,2-DCP), and benzene with the highest concentration detections occurring in the western and southern portions of the property. The soil vapor investigation concluded that soil vapor monitoring should continue in the western and southern portions of the property but could be discontinued in the northern and eastern portions. The groundwater monitoring report for the second period of 2023 reported elevated concentrations of 1,2,3-TCP, 1,2-DCP, 1,2-dichloroethane (1,2-DCA), 1,2-dibromoethane (1,2-DBA), 1,2-dichlorobenzene (1,2-DCB), 1,1-dichloroethene (1,1-DCE), 1,3-dichloropropane, chlorobenzene, cis-1,2-DCE, tetrachloroethene (PCE), trans-1,2-DCE, and vinyl chloride. Groundwater monitoring wells for this property are located on either side of the Channel. The OCHCA provides regulatory oversight and the case remains open as of January 1, 2012. Based on the open status of the case and contamination detected in groundwater on both sides of the Channel, this property represents an environmental concern to the Site.</p>
Kelvin Property	CA ENVIROSTOR, CA VCP	2552 Kelvin Avenue	<p>This property was identified as a voluntary cleanup property and was previously utilized as a pesticide, insecticide, and rodenticide storage facility with potential storage of methylene chloride. A preliminary endangerment assessment report was completed for the property and the DTSC recommended no further action was needed; therefore, this property is not expected to represent a significant environmental concern.</p>

6.2 VAPOR ENCROACHMENT CONDITION

According to ASTM E2600-15, the goal of conducting a vapor encroachment screening on a parcel of property is to identify a vapor encroachment condition (VEC), which is the presence or likely presence of chemicals of concern vapors in the subsurface of the target property (TP) caused by the release of vapors from contaminated soil or groundwater or both either on or near the target property as identified by Tier 1 or Tier 2 procedures. The purpose of Tier 1 is to conduct a screen using Phase I ESA-type information to determine if a VEC exists at the target property. If the Tier 1 screen cannot rule out the possibility of a VEC existing at the target property, then a Tier 2 screen can be conducted. Tier 2 applies numeric screening criteria to existing or newly collected soil, soil gas, and/or groundwater testing results to evaluate whether or not a VEC can be ruled out. Tier 2 has two data collective components: non-invasive and invasive.

Tier 1 screening begins with the default area of concern (AOC) defined by the approximate minimum search distances adjusted as appropriate for local conditions, and then determining if known or suspected contaminated properties with contaminants of concern (COCs) exist within the established AOC. The default AOC is one third of a mile around the TP for COCs and one-tenth of a mile for petroleum hydrocarbon COCs. The AOC is measured from the TP boundary to a contaminated property with known or suspected COC contamination of soil or groundwater or both. The default AOC may be expanded or reduced by the environmental professional (adjusted AOC) using experience and professional judgment, based on factors like groundwater flow direction, subsurface characteristics, surficial features and man-made features.

If groundwater flow direction is known or can be inferred from the Phase I ESA investigation of the TP, the default AOC in the down-gradient direction may be reduced to the area within the critical distance of 100 feet. The AOC in the cross-gradient direction may also be reduced, depending upon the critical distance and the width of the COC-contaminated plume associated with a known or likely COC-contaminated property located in a cross-gradient direction from the TP. The critical distance is the lineal distance in any direction between the nearest edge of the contaminated plume and the nearest TP boundary, and is equal to 100 feet for COCs or 30 feet for dissolved petroleum hydrocarbon COCs.

For a COC-contaminated property identified in Tier 1 located down-gradient from the TP, it is not necessary to have information on migrating groundwater contaminated plume dimensions as the critical distance is measured from the nearest TP boundary to the source of contamination at the off-site down-gradient property. In this case, the AOC may be reduced to the area within the critical distance.

For a contaminated property identified in Tier 1 located crossgradient from the TP, the AOC will be the area within the critical distance plus one half of a reasonable estimation of the contaminated plume width (at the point nearest the closest TP boundary) that might be associated with the nearby known or suspected COC-contaminated property (that is, the COC-contaminated property where the groundwater contamination originated). The environmental professional's judgment and experience can be used to estimate the width of the COC-contaminated plume that might be associated with the nearby known or suspected COC-contaminated property. If it is not possible to estimate the contaminated plume width, then the AOC cannot be reduced in the cross-gradient direction.

Citadel reviewed information provided by EDR regarding nearby properties to evaluate for potential on-Site vapor encroachment concerns from off-site sources. According to EDR, historical releases of petroleum products from a leaking underground storage tank (LUST)

occurred within 0.25-mile and upgradient of the Site. Great Lakes Chemical Corp, located at 17461 Derian Avenue, is listed as a LUST site. According to EDR, the property is located to the east of Section C and the VOC leak was discovered in the mid 1980s during site investigations prior to property redevelopment. The OCHCA provides regulatory oversight and the case remains open as of January 1, 2012. The extensive subsurface contamination related to the property is expected to represent an environmental concern.

EDR also provided the listings on the Historical Gas Station and Dry Cleaners databases within 0.25-mile radius of the Site. One property was identified on the Historical Cleaners database and was not located within 100 feet of the Site.

One property was identified on the Historical Gas Station databases as within 100 feet of the Site. This property address is listed as 2790 Kelvin Avenue, Apartment 1102. According to EDR, Custom Business operated a gasoline service station at the property in 2014. This property was developed with the current multi-family residential structure in 2014 and this listing is likely a business address associated with a gasoline service station in a different location.

A copy of the vapor encroachment screen provided by EDR is included as Appendix I.

7.0 DATA GAPS

A data gap is a lack of or inability to obtain information despite good faith efforts to gather such information. A data failure is a failure to achieve the historical research objectives even after reviewing the standard historical sources that are reasonably ascertainable and likely to be useful.

The following data gaps have been identified during the course of this investigation:

- Additional governmental agencies that are not included in the Government Records report may maintain information regarding environmental conditions at the Site and nearby facilities. However, based on the nature of the Site as a concrete channel, no further information has been requested.

With regard to these data gaps, Citadel believes that the most significant potential sources for on-site contamination have been identified during the current investigation and the Phase I ESA was performed in compliance with all appropriate inquiry, published in 40 CFR 312.

8.0 FINDINGS

Citadel EHS (Citadel) was contracted by UltraSystems Environmental (Client) to perform a Phase I Environmental Site Assessment (Phase I ESA) of the Barranca Channel Segment 6 of the Irvine Business Complex (IBC) Trail Study/Plan, in the City of Irvine, Orange County, California; hereinafter referred to as the "Site."

PROJECT INFORMATION

The Barranca Channel Segment 6 of the Project is located approximately 0.48 mile northeast of the Interstate 405 Freeway, locally referred to as the San Diego Freeway. The purpose of the Project is to construct an 11-foot wide (with two foot wide shoulders) multi-use trail along the Channel.

The Site is limited to 1.5 mile of the Channel, that extends south from Barranca Parkway towards Main Street and turns east near Main Street to its end at Jamboree Road. The general Site vicinity is occupied by commercial, industrial, and residential properties. According to the USGS Tustin Quadrangle (7.5 Minute Series), dated 2022, the Site is at an elevation of approximately 41 feet above mean sea level (AMSL) and appears to slope gradually to the west.

Based on the linear aspect of the Site, the Phase I ESA focuses on properties along the Site that may adversely impact the vicinity of the construction areas and workers. The extent of the Phase I ESA includes properties approximately 100 feet from the Site boundaries although select properties located beyond the 100-foot radius were reviewed based on their potential environmental impact to the Site.

ENVIRONMENTAL DATABASES

As part of the Phase I ESA, Citadel utilized EDR, as an information source for regulatory agency database records. Information from standard federal, state, county, and city environmental record sources was provided by ERS. The following summary of the database information is divided into four columns. The first column identifies the environmental database researched; the second column indicates the distance from the Site that was used for the research; the third column indicates if the Site was identified in the specified database; and the fourth column lists the number of listings identified on the database within the specified distance of the Site.

Database	Radius	Site Identified	No. of Listings Identified
National Priorities List	1 mile	No	0
RCRA Corrective Action Treatment/Storage/Disposal (TSD) Facilities (CORRACTS)	1 mile	No	2
Delisted National Priorities List	1 mile	No	0
CERCLIS Sites	½ mile	No	0
CERCLIS No Further Remedial Action Planned (NFRAP) Sites	½ mile	No	0
RCRA Non-Corrective Action TSD Facilities	½ mile	No	2
State/Tribal Voluntary Cleanup Sites	½ mile	No	2
State/Tribal Leaking Registered Storage Tank Sites	½ mile	No	90
State/Tribal Brownfield Sites/CERCLIS Equivalent	1 mile	No	0
Historic CORTESE List	½ mile	No	42
State/Tribal Solid Waste Landfill Sites/Facilities	½ mile	No	0
Federal/State/Tribal Engineering Controls Registries	½ mile	No	0
Federal/State/Tribal Institutional Controls Registries	½ mile	No	0
RCRA Large Quantity Generators	¼ mile	No	8
RCRA Small Quantity Generators	¼ mile	No	43

Database	Radius	Site Identified	No. of Listings Identified
RCRA Non Generators	¼ mile	No	79
State/Tribal Registered Storage Tank Sites	¼ mile	No	39
HIST UST	¼ mile	No	21
CA FID UST	¼ mile	No	10
SWEEPS UST	¼ mile	No	11
Facility Index System (FINDS)	Site	No	0
HAZNET	Site	No	0
Orphan	N/A	No	10

The following provides information on areas where there may be environmental concerns based on our environmental database and regulatory agency research.

SECTION A

The properties along the Site in this area are occupied by commercial and industrial properties. No environmental concerns were identified for Section A.

SECTION B

The properties along the Site in this area are occupied by commercial, industrial, and multi-family residential properties. A railway track is located along a portion of Section B. The listings are not likely to represent a significant environmental concern with the exception of the following:

- The property located at 2525 McGaw Avenue is occupied by a medical supplies manufacturer with large quantities of hazardous waste generation. This property has been occupied as an industrial property since the 1970s. A railway spur is located at the property along the Site. Chemicals and herbicides are commonly used to treat railroad ties. Based on the long-term industrial use and proximity to railway tracks, this property represents an environmental concern to the Site.

The railway track along a portion of Section B represents an environmental concern.

SECTION C

The properties along the Site in this area are occupied by commercial, industrial, and multi-family residential properties, and a hotel property. A railway track is located along a portion of Section C. The listings are not likely to represent a significant environmental concern with the exception of the following:

- The property located at 17461 Derian Avenue was formerly occupied by a pesticide packaging facility. This property adjoins the Site to the east. Soil, groundwater, and soil vapor contamination has been identified migrating from the property towards the west,

directly across the Channel. The case remains open and represents an environmental concern to the Site.

The railway track along a portion of Section C represents an environmental concern.

9.0 CONCLUSIONS AND RECOMMENDATIONS

According to ASTM Standard of Practice E1527-21, recognized environmental conditions (REC) fall under three specific categories when evaluating a site or properties within the site vicinity. These categories are defined below.

A recognized environmental condition, or REC, means the (1) presence of any hazardous substances or petroleum products in, on, or at the subject property due to a release to the environment; (2) the likely presence of hazardous substances or petroleum products in, on, or at the subject property due to a release or likely release to the environment; or (3) the presence of hazardous substances or petroleum products in, on, or at the subject property under conditions that pose a material threat of a future release to the environment. De minimis conditions are not recognized environmental conditions.

A controlled recognized environmental condition, or CREC, is a recognized environmental condition affecting the subject property that has been addressed to the satisfaction of the applicable regulatory authority or authorities with hazardous substances or petroleum products allowed to remain in place subject to implementation of required controls (for example, activity and use limitations or other property use limitations).

An historical recognized environmental condition, or HREC, is a previous release of hazardous substances or petroleum products affecting the subject property that has been addressed to the satisfaction of the applicable regulatory authority or authorities and meeting unrestricted use criteria established by the applicable regulatory authority or authorities without subjecting the subject property to any controls (for example, activity and use limitations or other property use limitations).

According to ASTM E2600-15, the goal of conducting a vapor encroachment screening on a parcel of property is to identify a vapor encroachment condition (VEC), which is the presence or likely presence of chemicals of concern vapors in the subsurface of the target property caused by the release of vapors from contaminated soil or groundwater or both either on or near the target property as identified by Tier 1 or Tier 2 procedures. The purpose of Tier 1 is to conduct a screen using Phase I ESA-type information to determine if a VEC exists at the target property. If the Tier 1 screen cannot rule out the possibility of a VEC existing at the target property, then a Tier 2 screen can be conducted. Tier 2 applies numeric screening criteria to existing or newly collected soil, soil gas, and/or groundwater testing results to evaluate whether a VEC can be ruled out. Tier 2 has two data collective components: non-invasive and invasive.

Based on a review of historical and present records, and Site reconnaissance, Citadel believes that sufficient information was collected and evaluated for the Site to determine if a REC, HREC, CREC, or a de minimis condition exists. Based on our review, reported release incidents that would represent RECs in connection with the Site or a source of a release that would be likely to contribute to a VEC was identified. Citadel identified the following environmental concerns:

- Railway tracks are located along portions of Sections B and C. The close proximity of railway tracks may represent a REC due to chemicals and herbicides commonly used to treat railroad ties.
- The property located at 2525 McGaw Avenue has been occupied as an industrial property since the 1970s. A railway spur is located at the property along the Site. Based on the long-term industrial use and proximity to railway tracks, this property represents a REC.
- The property located at 17461 Derian Avenue was formerly occupied by a pesticide packaging facility. Soil, groundwater, and soil vapor contamination has been identified at this property east of the Site and migrating to the west, directly across the Channel. The migration of contaminated plumes from this property across the Site represents a REC.

No evidence for designating the Site as a HREC or CREC from reviews of historic documents and present Site conditions was found. Citadel recommends the following:

- Preparation of a Soil Management Plan (SMP) to address the concerns identified above during construction of the Project. The SMP may include soil monitoring during excavation activities of areas identified with environmental concerns.

10.0 LIMITATIONS

The information and opinions rendered in this report are exclusively for use by the Client. Citadel will not distribute this report without the Client's written consent, except as may be required by law or court order. The recommendations expressed in this report took into consideration the purpose and scope of this limited assignment. We accept responsibility for the competent performance of our duties in executing the assignment and preparing this report in accordance with the normal standards of our profession but disclaim any responsibility for consequential damages resulting from inaccuracies in information provided by the Client, federal, state, county, or local regulatory agencies.

11.0 DISCLAIMER

The services performed by Citadel Environmental Services, Inc. ("Citadel"), d.b.a. Citadel EHS, in connection with this Report were performed in accordance with generally and currently accepted engineering practices and principles; provided, however, Citadel completed such services as directed by the Client and the recommendations described in this Report are therefore limited in purpose and scope. The procedures and methodologies used by Citadel in its performance of services, and the recommendations contained herein, are not intended to meet the requirements under any specific laws or regulatory guidelines unless expressly set forth in the Proposal.

The recommendations and conclusions set forth in this Report are based on information and data available to Citadel during the course of its performance of the services. Citadel relied on the information and data provided by or on behalf of Client, including, if applicable, historical and present operations, conditions and test data, and Citadel assumed all such information and data was correct and complete. Citadel shall not be liable for any damages or losses resulting from inaccuracies of, or omissions from, information or data provided by or on behalf of the Client, any interested third-parties, or any federal, state, county, or local governmental authority, or otherwise available in the public domain.

The information contained in this Report and conclusions resulting therefrom are based solely on information available to Citadel at the time of its performance of services, and from observations and perceived conditions and materials existing on the date of Citadel's limited survey of the site, if applicable. Citadel disclaims any inaccuracy in the Report as a result of any part or parcel of property to which Citadel was not provided access, or which was concealed, including, but not limited to, wall cavities/chases, ceiling plenums, below floor finishes, crawlspaces, below grade, beneath existing structures, or behind electrical panels.

The findings and recommendations presented in this Report are based upon observations of present conditions and may not necessarily indicate future conditions. No conclusions should be construed or inferred other than those expressly stated in this Report. EXCEPT FOR ANY WARRANTIES EXPRESSLY SET FORTH IN THE PROPOSAL OR OTHER WRITTEN AGREEMENT BETWEEN CITADEL AND CLIENT, CITADEL MAKES NO WARRANTIES HEREUNDER WITH RESPECT TO ANY INFORMATION CONTAINED IN THIS REPORT, EXPRESS OR IMPLIED, AND CITADEL HEREBY DISCLAIMS ALL OTHER WARRANTIES.

All testing and remediation methods have reliability limitations and no method nor number of sampling locations can guarantee that a hazard will be discovered if contamination or other evidence of the hazard is not encountered within the performance of the services as authorized. Reliability of testing or remediation varies according to the sampling frequency and other service variables that were selected by Client. Citadel shall not be at fault or liable for any such limitations.

The information and opinions rendered in this report are exclusively for use and reliance by the Client. The information contained herein may not be used, disclosed, or copied without written permission of the Client and may not be relied upon without the written permission of Citadel.

13.0 PROFESSIONAL CERTIFICATION

Citadel has completed a Phase I ESA of the Barranca Channel Segment 6 of the IBC Trail Study/Plan located in the City of Irvine, Orange County, California. The Phase I ESA was performed at the Clients request in accordance with the American Society for Testing and Materials (ASTM) Standard of Practice E1527-21 and the standards of care and diligence normally practiced by recognized consulting firms in performing services of a similar nature.

The independent conclusions represent our professional judgment based on information and data available to Citadel during the course of this project. Information regarding historical and present operations, conditions and test data provided by the Client or their representative, is assumed to be correct and complete. The conclusions presented by this Phase I ESA are based on information provided to Citadel and from observations and perceived conditions existing on the date of the site reconnaissance.

In expressing the opinions stated in this report, Citadel has exercised the degree of skill and care ordinarily exercised by a reasonable prudent environmental professional. Documentation provided by the Client, Client-designated representatives, interested third-parties, or from the public domain, and referenced in preparation of the Phase I ESA report, have been assimilated with the understanding that Citadel assumes no responsibility or liability for their accuracy.

I declare that to the best of my professional knowledge and belief, I meet the definition of Environmental Professional as defined by the final All Appropriate Inquiry (AAI) Rule published in 40 CFR Part 312.10 (December 15, 2022). I have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting described in this Phase I ESA. I have developed and performed the AAI in conformance with the standard and care of this Rule.

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

Limited Permission To Make Copies

Citadel EHS (the client) is permitted to make up to FIVE photocopies of this Sanborn Map transmittal and each fire insurance map accompanying this report solely for the limited use of its customer. No one other than the client is authorized to make copies. Upon request made directly to an EDR Account Executive, the client may be permitted to make a limited number of additional photocopies. This permission is conditioned upon compliance by the client, its customer and their agents with EDR's copyright policy; a copy of which is available upon request.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at approximately five year intervals.

Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1920 through current. This report compiles information gathered in this review by geocoding the latitude and longitude of properties identified and gathering information about properties within 1716 feet of the target property.

Summary information obtained is provided in the text of this report.

RECORD SOURCES

The EDR City Directory Report accesses a variety of business directory sources, including Haines, InfoUSA, Polk, Cole, Bresser, and Stewart. Listings marked as EDR Digital Archive access Cole and InfoUSA records. The various directory sources enhance and complement each other to provide a more thorough and accurate report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer.

RESEARCH SUMMARY

The following research sources were consulted in the preparation of this report. An "X" indicates where information was identified in the source and provided in this report.

Site Name:

Barranca Channel
Barranca Channel
Irvine, CA 92606
EDR Inquiry # 7582918.8

Client Name:

Citadel EHS
1725 Victory Boulevard
Glendale, CA 91201
Contact: Kyle Johnston

EDR Topographic Map Library has been searched by EDR and maps covering the target property location as provided by Citadel EHS were identified for the years listed below. EDR's Historical Topo Map Report is designed to assist professionals in evaluating potential liability on a target property resulting from past activities. EDR's Historical Topo Map Report includes a search of a collection of public and private color historical topographic maps, dating back to the late 1800s.

User Questionnaire

DATE SENT: DATE DUE: _____

HOW SENT (Circle): Fax / Email FAX / EMAIL:

User Questionnaire	
Client	
Contact Name	
Contact Title	
Phone/Fax/Email	
Completed by?	
Response Date	
Form of Response	
Current Use of the Property	
Reason for Performing Phase I	

Please include the name of the Companies who provide your utilities, so we can contact each agency:

Utilities	
Electricity	
Natural Gas	
Sewage	
Sanitary Sewerage	
Solid Waste Removal	
Fuel Oil	
Steam	

Please include the Name and Company of Each of the following individuals:

User	Name	Company
Key Site Manager		
Current Property Owner		
Current Property Owner Representative		
Occupants		
Major Occupants		
Current Operator Name		
Past Property Owner(s)		
Past Property Owner Representative(s)		
Other Past Property Owner(s)		
Past Operator Name(s)		
Past Occupant(s)		
Past Major Occupant(s)		
Broker(s)		
Property Manager		
Building Engineer		
Other		

TITLE & JUDICIAL RECORDS

Per ASTM E 1527-13 Section 6.2, the User is required to provide and/or report to the environmental professional any title and/or judicial records so identified for the subject property.

Please provide any information on title and/or judicial records:

ENVIRONMENTAL LIENS OR ACTIVITY AND USE LIMITATIONS

Per ASTM E 1527-13 the User is required to provide and/or report to the environmental professional any environmental liens or AULs so identified for the subject property. The environmental professional per the ASTM practice is not responsible to undertake a review of information to identify environmental liens or AULs.

Please provide any information on environmental liens or activity and use limitations (AULs):

SPECIALIZED OR ACTUAL KNOWLEDGE OF USER

Per the ASTM standard, it is the User's responsibility to communicate to the environmental professional any information that is material to recognized environmental conditions in connection with the subject property based on such specialized knowledge, actual knowledge, experience, or commonly known and reasonably ascertainable information within the local community.

Please provide any information of the following items:

ASTM Scope Item	Property Contact Aware of them (Y/N)	Comment
USTs		
ASTs		
PCB Electrical Equipment		
Hydraulic Equipment		
Chemicals, Hazardous Materials, and Raw Materials Storage and Usage		
Waste Generation, Storage and Disposal		
Wells, Sumps, Pits, and Floor Drains		
Stormwater Runoff and Surface Water		
Lagoons, Septic Systems, Wastewater Treatment, and Separators		
Stressed Vegetation, Staining and Odors		
Surficial Disturbances		
On-Property Dry Cleaners		

NON-ASTM Scope Item	Property Contact Aware of them (Y/N)	Comment
Asbestos Containing Materials		
Radon		
Lead-Based Paint		
Lead in Drinking Water		
Potable Well		
Potential Wetlands		
Air Emissions		
Mold/Water Intrusion		

Please refer to “Helpful Documents” section below to provide any relevant reports associated with the above items.

VALUATION REDUCTION FOR ENVIRONMENTAL ISSUES

(For Property Owner) Per the ASTM standard, in a transaction involving the purchase of a parcel of commercial real estate, the user shall consider the relationship of the purchase price of the property to the fair market value of the property if the property was not affected by hazardous substances or petroleum products. The User should try to identify an explanation for a significantly lower price which does not reasonably reflect fair market value if the property was not contaminated, and make a written record of such explanation. The ASTM standard does not require that a real estate appraisal be obtained in order to ascertain fair market value of the property.

PROCEEDINGS INVOLVING THE PROPERTY

Per the ASTM standard, prior to the site visit, the User (if different from the property owner), Key site manager (if any is identified), and property owner shall be asked whether they know of (1) any pending, threatened, or past litigation relevant to hazardous substances or petroleum products in, on, or from the property; (2) any notices from any governmental entity regarding any possible violation of environmental laws or possible liability relating to hazardous substances or petroleum products.

- **Do you know of any pending, threatened, or past litigation relevant to hazardous substances or petroleum products in, or from the property? Y / N**
If yes, please explain:

- Do you know of any notices from any governmental entity regarding any possible violation of environmental laws or possible liability relating to hazardous substances or petroleum products? Y / N**
If yes, please explain:

HELPFUL DOCUMENTS

Per the ASTM Standard, Prior to the property visit, the Property owner, key site manager (if any is identified), and User (if different from the property owner) shall be asked if they know whether any of the documents below exist and if so, whether copies can and will be provided within reasonable time and cost constraints:

	User		Key Site Manager		Property Owner	
	Exist	Provided	Exist	Provided	Exist	Provided

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E1527 - 21), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E2247 - 16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E1528 - 22) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

EXECUTIVE SUMMARY

TARGET PROPERTY SEARCH RESULTS

The target property was not listed in any of the databases searched by EDR.

DATABASES WITH NO MAPPED SITES

No mapped sites were found in EDR's search of available ("reasonably ascertainable ") government records either on the target property or within the search radius around the target property for the following databases:

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal NPL (Superfund) sites

NPL..... National Priority List
Proposed NPL..... Proposed National Priority List Sites
NPL LIENS..... Federal Superfund Liens

Lists of Federal Delisted NPL sites

Delisted NPL..... National Priority List Deletions

Lists of Federal sites subject to CERCLA removals and CERCLA orders

FEDERAL FACILITY..... Federal Facility Site Information listing
SEMS..... Superfund Enterprise Management System

Federal institutional controls / engineering controls registries

LUCIS..... Land Use Control Information System
US ENG CONTROLS..... Engineering Controls Sites List
US INST CONTROLS..... Institutional Controls Sites List

Federal ERNS list

ERNS..... Emergency Response Notification System

Lists of state and tribal landfills and solid waste disposal facilities

CA SWF/LF..... Solid Waste Information System

Lists of state and tribal leaking storage tanks

INDIAN LUST..... Leaking Underground Storage Tanks on Indian Land

Lists of state and tribal registered storage tanks

FEMA UST..... Underground Storage Tank Listing
INDIAN UST..... Underground Storage Tanks on Indian Land

EXECUTIVE SUMMARY

Lists of state and tribal voluntary cleanup sites

INDIAN VCP..... Voluntary Cleanup Priority Listing

Lists of state and tribal brownfield sites

CA BROWNFIELDS..... Considered Brownfields Sites Listing

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS..... A Listing of Brownfields Sites

Local Lists of Landfill / Solid Waste Disposal Sites

CA WMUDS/SWAT..... Waste Management Unit Database
CA SWRCY..... Recycler Database
CA HAULERS..... Registered Waste Tire Haulers Listing
INDIAN ODI..... Report on the Status of Open Dumps on Indian Lands
ODI..... Open Dump Inventory
DEBRIS REGION 9..... Torres Martinez Reservation Illegal Dump Site Locations
IHS OPEN DUMPS..... Open Dumps on Indian Land

Local Lists of Hazardous waste / Contaminated Sites

US HIST CDL..... Delisted National Clandestine Laboratory Register
CA CDL..... Clandestine Drug Labs
CA Toxic Pits..... Toxic Pits Cleanup Act Sites
US CDL..... National Clandestine Laboratory Register

Local Land Records

CA LIENS..... Environmental Liens Listing
LIENS 2..... CERCLA Lien Information

Records of Emergency Release Reports

HMIRS..... Hazardous Materials Information Reporting System
CA LDS..... Land Disposal Sites Listing
CA MCS..... Military Cleanup Sites Listing
CA SPILLS 90..... SPILLS 90 data from FirstSearch

Other Ascertainable Records

DOD..... Department of Defense Sites
SCRD DRYCLEANERS..... State Coalition for Remediation of Drycleaners Listing
US FIN ASSUR..... Financial Assurance Information
EPA WATCH LIST..... EPA WATCH LIST
2020 COR ACTION..... 2020 Corrective Action Program List
TSCA..... Toxic Substances Control Act
TRIS..... Toxic Chemical Release Inventory System
SSTS..... Section 7 Tracking Systems

EXECUTIVE SUMMARY

ROD.....	Records Of Decision
RMP.....	Risk Management Plans
RAATS.....	RCRA Administrative Action Tracking System
PRP.....	Potentially Responsible Parties
PADS.....	PCB Activity Database System
FTTS.....	FIFRA/ TSCA Tracking System - FIFRA (Federal Insecticide, Fungicide, & Rodenticide Act)/TSCA (Toxic Substances Control Act)
MLTS.....	Material Licensing Tracking System
COAL ASH DOE.....	Steam-Electric Plant Operation Data
COAL ASH EPA.....	Coal Combustion Residues Surface Impoundments List
PCB TRANSFORMER.....	PCB Transformer Registration Database
RADINFO.....	Radiation Information Database
HIST FTTS.....	FIFRA/TSCA Tracking System Administrative Case Listing
DOT OPS.....	Incident and Accident Data
CONSENT.....	Superfund (CERCLA) Consent Decrees
INDIAN RESERV.....	Indian Reservations
FUSRAP.....	Formerly Utilized Sites Remedial Action Program
UMTRA.....	Uranium Mill Tailings Sites
LEAD SMELTERS.....	Lead Smelter Sites
US MINES.....	Mines Master Index File
MINES MRDS.....	Mineral Resources Data System
ABANDONED MINES.....	Abandoned Mines
UXO.....	Unexploded Ordnance Sites
DOCKET HWC.....	Hazardous Waste Compliance Docket Listing
FUELS PROGRAM.....	EPA Fuels Program Registered Listing
PFAS NPL.....	Superfund Sites with PFAS Detections Information
PFAS FEDERAL SITES.....	Federal Sites PFAS Information
PFAS TSCA.....	PFAS Manufacture and Imports Information
PFAS TRIS.....	List of PFAS Added to the TRI
PFAS RCRA MANIFEST.....	PFAS Transfers Identified In the RCRA Database Listing
PFAS ATSDR.....	PFAS Contamination Site Location Listing
PFAS WQP.....	Ambient Environmental Sampling for PFAS
PFAS NPDES.....	Clean Water Act Discharge Monitoring Information

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.

Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal CERCLA sites with NFRAP

SEMS-ARCHIVE: SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be potential NPL site.

A review of the SEMS-ARCHIVE list, as provided by EDR, and dated 01/29/2024 has revealed that there

EXECUTIVE SUMMARY

are 2 SEMS-ARCHIVE sites within approximately 0.5 miles of the target property.

Lists of Federal RCRA facilities undergoing Corrective Action

CORRACTS: CORRACTS is a list of handlers with RCRA Corrective Action Activity. This report shows which nationally-defined corrective action core events have occurred for every handler that has had corrective action activity.

A review of the CORRACTS list, as provided by EDR, and dated 12/04/2023 has revealed that there are 2 CORRACTS sites within approximately 1 mile of the target property.

Lists of Federal RCRA TSD facilities

RCRA-TSDF: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

A review of the RCRA-TSDF list, as provided by EDR, and dated 12/04/2023 has revealed that there are 2 RCRA-TSDF sites within approximately 0.5 miles of the target property.

EXECUTIVE SUMMARY

Lists of Federal RCRA generators

RCRA-LQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

A review of the RCRA-LQG list, as provided by EDR, and dated 12/04/2023 has revealed that there are 8 RCRA-LQG sites within approximately 0.25 miles of the target property.

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 12/04/2023 has revealed that there are 43 RCRA-SQG sites within approximately 0.25 miles of the target property.

Lists of state- and tribal (Superfund) equivalent sites

CA RESPONSE: Identifies confirmed release sites where DTSC is involved in remediation, either in a lead or oversight capacity. These confirmed release sites are generally high-priority and high potential risk.

A review of the CA RESPONSE list, as provided by EDR, has revealed that there is 1 CA RESPONSE site within approximately 1 mile of the target property.

Lists of state- and tribal hazardous waste facilities

CA ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the CA ENVIROSTOR list, as provided by EDR, and dated 10/23/2023 has revealed that there are 23 CA ENVIROSTOR sites within approximately 1 mile of the target property.

CA CPS-SLIC: Cleanup Program Sites (CPS; also known as Site Cleanups [SC] and formerly known as Spills, Leaks, Investigations, and Cleanups [SLIC] sites) included in GeoTracker. GeoTracker is the Water Boards data management system for sites that impact, or have the potential to impact, water quality in California, with emphasis on groundwater.

A review of the CA CPS-SLIC list, as provided by EDR, has revealed that there are 30 CA CPS-SLIC sites within approximately 0.5 miles of the target property.

Lists of state and tribal registered storage tanks

CA UST: The Underground Storage Tank database contains registered USTs. USTs are regulated under Subtitle I of the Resource Conservation and Recovery Act (RCRA). The data come from the State Water Resources Control Board's Hazardous Substance Storage Container Database.

A review of the CA UST list, as provided by EDR, has revealed that there are 29 CA UST sites within approximately 0.25 miles of the target property.

Local Lists of Registered Storage Tanks

CA SWEEPS UST: Statewide Environmental Evaluation and Planning System. This underground storage tank listing was updated and maintained by a company contacted by the SWRCB in the early 1990's. The listing is no longer updated or maintained. The local agency is the contact for more information on a site on the SWEEPS list.

A review of the CA SWEEPS UST list, as provided by EDR, and dated 06/01/1994 has revealed that there are 11 CA SWEEPS UST sites within approximately 0.25 miles of the target property.

EXECUTIVE SUMMARY

Local Land Records

CA DEED: The use of recorded land use restrictions is one of the methods the DTSC uses to protect the public from unsafe exposures to hazardous substances and wastes .

A review of the CA DEED list, as provided by EDR, and dated 11/22/2023 has revealed that there is 1 CA DEED site within approximately 0.5 miles of the target property.

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 12/04/2023 has revealed that there are 79 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

EXECUTIVE SUMMARY

EPA ID:: CAC003072378

FUDS: The Listing includes locations of Formerly Used Defense Sites Properties where the US Army Corps Of Engineers is actively working or will take necessary cleanup actions.

A review of the FUDS list, as provided by EDR, and dated 09/28/2023 has revealed that there are 2 FUDS sites within approximately 1 mile of the target property.

<u>Equal/Higher Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>

PFAS ECHO: Regulators and the public have expressed interest in knowing which regulated entities may be using PFAS. EPA has developed a dataset from various sources that show which industries may be handling PFAS. Approximately 120,000 facilities subject to federal environmental programs have operated or currently operate in industry sectors with processes that may involve handling and/or release of PFAS.

A review of the PFAS ECHO list, as provided by EDR, and dated 09/23/2023 has revealed that there are 23 PFAS ECHO sites within approximately 0.25 miles of the target property.

EXECUTIVE SUMMARY

CA PFAS: A listing of PFAS contaminated sites included in the GeoTracker database.

A review of the CA PFAS list, as provided by EDR, and dated 11/30/2023 has revealed that there is 1 CA PFAS site within approximately 0.25 miles of the target property.

<u>Lower Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>
ROYALTY CARPET MILLS	17352 DERIAN AV	SSW 1/8 - 1/4 (0.127 mi.)	X167	918

CA Cortese: The sites for the list are designated by the State Water Resource Control Board (LUST), the Integrated Waste Board (SWF/LS), and the Department of Toxic Substances Control (Cal-Sites).

A review of the CA Cortese list, as provided by EDR, and dated 09/19/2023 has revealed that there are 42 CA Cortese sites within approximately 0.5 miles of the target property.

CA CERS: The CalEPA Regulated Site Portal database combines data about environmentally regulated sites and facilities in California into a single database. It combines data from a variety of state and federal databases, and provides an overview of regulated activities across the spectrum of environmental programs for any given location in California. These activities include hazardous materials and waste, state and federal cleanups, impacted ground and surface waters, and toxic materials

A review of the CA CERS list, as provided by EDR, and dated 10/16/2023 has revealed that there is 1 CA CERS site within approximately 0.001 miles of the target property.

EXECUTIVE SUMMARY

UST FINDER RELEASE: US EPA's UST Finder data is a national composite of leaking underground storage tanks. This data contains information about, and locations of, leaking underground storage tanks. Data was collected from state sources and standardized into a national profile by EPA's Office of Underground Storage Tanks, Office of Research and Development, and the Association of State and Territorial Solid Waste Management Officials.

A review of the UST FINDER RELEASE list, as provided by EDR, and dated 06/08/2023 has revealed that there are 43 UST FINDER RELEASE sites within approximately 0.5 miles of the target property.

EXECUTIVE SUMMARY

UST FINDER: EPA developed UST Finder, a web map application containing a comprehensive, state-sourced national map of underground storage tank (UST) and leaking UST (LUST) data. It provides the attributes and locations of active and closed USTs, UST facilities, and LUST sites from states and from Tribal lands and US territories. UST Finder contains information about proximity of UST facilities and LUST sites to: surface and groundwater public drinking water protection areas; estimated number of private domestic wells and number of people living nearby; and flooding and wildfires.

A review of the UST FINDER list, as provided by EDR, and dated 06/08/2023 has revealed that there are 2 UST FINDER sites within approximately 0.25 miles of the target property.

<u>Lower Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR Hist Auto: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Auto list, as provided by EDR, has revealed that there is 1 EDR Hist Auto site within approximately 0.125 miles of the target property.

<u>Equal/Higher Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>
CUSTOM BUSINESS	2790 KELVIN AVE APT	S 0 - 1/8 (0.100 mi.)	S100	557

EDR Hist Cleaner: EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Cleaner list, as provided by EDR, has revealed that there is 1 EDR Hist Cleaner site within approximately 0.125 miles of the target property.

Environmental Interest/Information System:

The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Eval General Type: Other/Unknown
Eval Date: 06-04-2018
Violations Found: No
Eval Type: Other, not routine, done by local agency
Eval Notes: Based on the California Environmental Reporting System (CERS) review for 2206 Alton Parkway - the site has failed to submit a complete Hazardous Materials Business Plan since 2016. The facility was previously issued a violation in October 2017 for failing to submit a complete certification in 2017. Issued an elevated violation based on the 2018 CERS review and additional violations for the individual elements. Pursuant to the California Health & Safety Code (H&SC) Chapter 6.95, Section 25508 and the California Code of Regulations (CCR) Title 19, Sections 2654 and 2655, businesses are required to electronically submit, review and update, or certify their hazardous materials inventory annually by March 1st.

Eval Notes: Orange County Environmental Health as the Certified Unified Program Agency (OC CUPA) is the administrating agency for the Hazardous Materials Disclosure and Business Emergency Plan programs (HMD/BEP) previously administered by the Orange County Fire Authority. During the months of August and December of 2013, the OC CUPA sent out letters to regulated businesses requesting them to electronically submit their HMD/BEP forms. Electronic submission of these forms is a legal requirement. Failure to submit HMD/BEP forms is in violation of the California Health & Safety Code Chapter 6.95. According to our records there is no electronic submission for this facility. Please go to www.esubmit.ocgov.com to request a username and password and submit your HMD/BEP forms within the next 30 days. Businesses may also submit forms via the California Environmental Reporting System. Please verify that all owner information that is prepopulated on the E-Submit Portal is still [Truncated]

Citation: 22 CCR 12 66262.34(d) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(d)
Violation Description: Failure to dispose of hazardous waste within 180 days (or 270 if waste is transported over 200 miles) for the generator who generates less than 1000 kilogram per month, but more than 100 kilograms per month.
Violation Notes: Returned to compliance on 04/08/2015. A drum of used oily absorbents was stored in the outside hazardous waste storage area. Its accumulation start date was unknown. Records showed no removal of used absorbents for the last year. A drum full of UV coating / cleaning fluid waste was also stored in the outside hazardous waste storage area. Its accumulation start date was unknown. Records showed no removal of this waste for the last year. Hazardous waste has been accumulating on site beyond the allowable small quantity generator (SQG) accumulation storage time. Have the waste removed by a registered hauler for proper recycling / disposal. Provide a copy of the removal record to this Agency within 30 days.

 Violations Found: No
 Eval Type: Routine done by local agency
 Eval Notes: On site for a routine hazardous waste inspection. Jerry Sutton,
 pressroom manager, was present for the inspection and provided consent
 to inspect. The facility's operations and the waste generated were
 discussed. The inspection included a walk behind the building. I did
 not observe hazardous waste in the facility's trash or as run off on
 the ground. The storage of the shop's hazardous waste was inspected.
 The storage containers were stored closed and labeled. We reviewed the
 required information to be marked on containers storing hazardous
 waste, such as identifying the hazardous property of the stored waste.
 The signed off manifests for the removal of the facility's hazardous
 waste were on site and available for inspection. The 2017 records were
 reviewed. The facility provided written spill response directions and
 emergency contact numbers for the employees.

Eval Notes: Orange County Environmental Health as the Certified Unified Program Agency (OC CUPA) is the administrating agency for the Hazardous Materials Disclosure and Business Emergency Plan programs (HMD/BEP) previously administered by the Orange County Fire Authority. During the months of August and December of 2013, the OC CUPA sent out letters to regulated businesses requesting them to electronically submit their HMD/BEP forms. Electronic submission of these forms is a legal requirement. Failure to submit HMD/BEP forms is in violation of the California Health & Safety Code Chapter 6.95. According to our records there is no electronic submission for this facility. Please go to www.esubmit.ocgov.com to request a username and password and submit your HMD/BEP forms within the next 30 days. Businesses may also submit forms via the California Environmental Reporting System. Please verify that all owner information that is prepopulated on the E-Submit Portal

Eval Source: CERS,

Eval General Type: Other/Unknown
Eval Date: 03-27-2015
Violations Found: No
Eval Type: Other, not routine, done by local agency
Eval Notes: Facility's hazardous materials disclosure forms were reviewed in e-submit and denied. Just a few revisions requested. > Starkote AQ 502 - was disclosed to be on site stored in a 55 gallon drum. However, the maximum daily amount on site at any one time was identified as 1 gallon. Please confirm. (note: the maximum amount of this chemical that the fire dept. would encounter on your site at any one time during the year - should be at least 55 gallons when you have a 55 gallon drum of the chemical on site. It would be more if you have more than one storage container). If chemical is on site in a smaller container and at a maximum amount always less than disclosure threshold of 55 gallons - then no need to disclose. > Starkote AQ 506 - was disclosed to be on site stored in a 55 gallon drum. However, the maximum daily amount on site at any one time was identified as 1 gallon. Please confirm. > Supreme Fount 7086 - was disclosed to be on site stored in a 55 gallon drum. [Truncated]

Environmental Interest/Information System:

The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Violation Notes: date.
Returned to compliance on 12/22/2016. Small containers of discarded hazardous materials, non-emptied broken aerosols, and universal waste were stuffed mixed together inside a cabinet marked only hazardous waste. The accumulating hazardous waste must be marked with the required information. Designated bins or areas for waste accumulation may be used and marked with the required information. Once corrected, submit the attached certificate of return to compliance, signed and dated, to this Agency within 30 days. Also, the accumulating mixed together hazardous waste may not be compatible. Store hazardous waste so that possible hazards are prevented.

Violations made in accordance with section 66262.11 for at least three years from the date that the waste was last sent to on-site or off-site treatment, storage, or disposal.

Violations Notes: Returned to compliance on 06/18/2020. Observed a bag of sandblasting dust attached to the sandblaster for the polishing of metal parts (stainless steel and aluminum). When asked about how the waste was handled an employee stated, "in the trash", when questioned further it was not clear if this was the regular trash or as a hazardous waste. Nothing was observed in the dumpsters at the site. I advised Mr. Pavlik to collect and analyze a waste sample of the sandblasting dust for hazardous waste properties in order to determine the waste classification and handle the waste stream appropriately. Do not dispose of the sandblasting waste in the regular trash until a waste determination has been made. Within 30 days provide proof to this office that the sample has been submitted for analysis at a State Certified Environmental Analytical Laboratory for hazardous properties and once the results are received please forward a copy to myself or this office for review.

Citation: 22 CCR 12 66262.40(c) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.40(c)

Violations Description: Failure to determine if the waste generated is a hazardous waste and to maintain analysis results for three years.

Violations Notes: Returned to compliance on 05/28/2014. The facility operations include metal component polishing. The materials polished were identified as stainless steel and aluminum alloy. The collected polishing dust waste was being handled as non-hazardous waste. The collected polishing dust waste was reportedly disposed of via the trash. Cease disposal of this waste into the trash immediately. Do not dispose of the waste until it has been determined by this agency to be non-hazardous. In order to make a hazardous waste determination, have a representative sample of the waste analyzed by a state certified lab for California regulated heavy metals (Title 22, CCR). Perform a Total Threshold Limit Concentration (TTLIC) analysis and if necessary, a Soluble Threshold

Evaluation:

Eval General Type: Other/Unknown
Eval Date: 05-13-2014
Violations Found: No
Eval Type: Other, not routine, done by local agency

Eval Notes: From: Krall, Joyce Sent: Tuesday, May 13, 2014 1:54 PM To: 'Angel Domingo' Subject: RE: HAZARDOUS MATERIALS DISCLOSURE - ESUBMIT Hi Angel, Thank you for your email. The numbers in the parenthesis refer to the form s numbered boxes. All those boxes that you were supplying information in are numbered. Example: The state waste code box is marked 220 in the upper right hand corner. Four hazardous waste violations were cited during the December inspection of Pro-dex. Two were regarding hazardous waste storage identification, one was regarding obtaining the signed off manifest copy from the TSDF for of your shipment of hazardous waste, and one was cited to conduct a hazardous waste determination of the shop s polishing dust waste. How is Pro-dex handling their polishing dust waste? Please contact me if you should have any questions. Regards, Joyce Krall, REHS Hazardous Waste Specialist Environmental Health Department Orange County Health Care [Truncated]

Eval Program: HMRRP
Eval Source: CERS,

Eval General Type: Other/Unknown
Eval Date: 06-12-2020
Violations Found: No
Eval Type: Other, not routine, done by local agency

Eval Notes: Met with Angel Domingo, Director of Compliance, to follow up on previous violations cited on 10/15/19. Discussed the violations and reviewed what was observed, we walked through the areas again to confirm if violations were still present. At the polishing station it was clear the oil/water mixture used in cleaning the metal parts was being managed properly as a hazardous waste. This was confirmed when I reviewed the hazardous waste manifests. The sandblasting dust was attached in bag filters to the sandblasting machines. The Aluminum and Stainless Steel parts are blasted with "beads" to polish the metal. The resulting dust waste is collected in bags attached to the machines. When I asked the employee's working in this area about the waste dust, he said they threw it in the trash. I did not observe any dust in the trash to confirm this. This is the second occurrence of possible illegal disposal activities. YOU HAVE 14 DAYS to perform a

Eval Notes: From: Krall, Joyce Sent: Thursday, December 22, 2016 10:58 AM To: 'Rick Van Kirk' Subject: RE: Certificate of return to compliance Hello Rick, Thank you for your follow up. Attached is our report acknowledging compliance. Regarding the photo: The sharps used for glue application that Angel described (dried glue in the used sharps) were not a hazardous waste. However, sharps are not to be disposed of via the trash but must be sent to an appropriate disposal location. For information on disposal of sharps: <http://oclandfills.com/hazardous/disposal> > If the sharps are handled as a hazardous waste, the photo shows several improvements are needed for the storage container. The label must identify the hazardous waste's physical state and hazardous property (some labels have boxes to check - but yours do not so you would have to write it in.) Also, the maximum accumulation storage time for this waste would be one year using the satellite storage rule. It like [Truncated]

Eval Notes: On site for a re inspection. Rick Boyd, director of manufacturing was present and allowed access to inspect. Inspection was to confirm the correction of the hazardous waste violations cited 12-9-13. Angel Domingo had informed me that the polishing dust waste would be handled as hazardous waste. Violation (W001) was corrected. Copies of the missing signed off manifests were provided. Violation (W038) was corrected. The unmarked small storage containers of hazardous waste and universal waste, which were located in a storage cabinet were reportedly removed under manifest. >>Please provide a copy of this document to this Agency for our review. This will correct violation (W013). Violation (W010) was not corrected. Drums storing oil / mop water were not marked with the accumulation start date of waste storage. Each container storing hazardous waste must be marked with the start date of the container's waste accumulation. We reviewed this requirement. The director [Truncated]

Completed Sub Area Name: Not reported
Completed Document Type: * Delisting Document
Completed Date: 05/07/2001
Comments: DLIST - SITE 3 (GREASE RACK): The purpose of the decision document is to present the selected action for the Site 3 - grease rack in accordance with the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA). It has been determined that the selected remedy of No Further Action (NFA) is protective of human health and the environment. The decision document describes the selected action based on the results of the Preliminary Assessment (PA) and other subsequent investigations conducted under the Installation Restoration Program (IRP). DTSC concurred with the decision document's NFA recommendation in a letter dated April 2, 2001. DTSC's agreement to remove this site from the IRP list does not represent certification or validation that the entire facility does not have any hazardous substance releases. Should DTSC become aware of potential hazardous substance releases, it will initiate appropriate action to correct the problem.

Completed Document Type: Inventory Project Report (INPR)
Completed Date: 10/07/1993
Comments: Not reported

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Preliminary Endangerment Assessment Report
Completed Date: 01/08/2001
Comments: PEA - GREASE RACK: The purpose of the Preliminary Assessment (PA) was to collect information concerning potential contamination from the Grease Rack sufficient to assess the threat posed to human health and the environment and to determine the need for appropriate action. Soil sampling was performed at this location and the results did not indicate any contamination of the soil above remediation goals. Based on the findings of the PA, the department concurred with the No Further Action recommendation in the report.

Eval Notes: Submittal was Not Applicable on 4/21/2020 by Jeff Nofal for Orange County Environmental Health Exempt Select this option if you feel you are exempt from this document upload requirement. Provide a short explanation of why you feel you are exempt in the space provided below. If the regulatory agency does not approve of the document exemption, the submittal element will be rejected. Exemption Description Per direction by Jeff Nofal on 4-10-2020, Booster Fuels filed in error and is exempt from APSA due to: Facility is a transportation related facility as defined in 40 CFR 112 App. A and does not "store" oil as all containers are DOT regulated tanker trucks used for the transport of oil in interstate or intrastate commerce and the equipment and appurtenance related thereto. Thus all tanker trucks fall outside the definition of "above ground storage tank" found in 25270.2 (a)6) of California HSC. Mixtures/Blends Containing, Before Use, Only The Above Spent Nonhalogenated Solvents; And All Spent Solvent Mixtures/Blends Containing, Before Use, One Or More Of The Above Nonhalogenated Solvents, And A Total Of Ten Percent Or More (By Volume) Of One Or More Of Those Solvents Listed In F001, F002, F004, And F005; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.

Waste Code: F004
Waste Description: The Following Spent Nonhalogenated Solvents: Cresols, Cresylic Acid, And Nitrobenzene; And The Still Bottoms From The Recovery Of These Solvents; All Spent Solvent Mixtures/Blends Containing, Before Use, A Total Of Ten Percent Or More (By Volume) Of One Or More Of The Above Nonhalogenated Solvents Or Those Solvents Listed In F001, F002, And F005; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.

Waste Code: F005
Waste Description: The Following Spent Nonhalogenated Solvents: Toluene, Methyl Ethyl Ketone, Carbon Disulfide, Isobutanol, Pyridine, Benzene, 2-Ethoxyethanol, And 2-Nitropropane; All Spent Solvent Mixtures/Blends Containing, Before Use, A Total Of Ten Percent Or More (By Volume) Of One Or More Of The Above Nonhalogenated Solvents Or Those Solvents Listed In F001, F002, Or F004; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.

Waste Code: P030
Waste Description: Cyanides (Soluble Cyanide Salts), Not Otherwise Specified

Waste Code: P038
Waste Description: Arsine, Diethyl- (Or) Diethylarsine

Waste Code: P044
Waste Description: Dimethoate (Or) Phosphorodithioic Acid, O,O-Dimethyl S-[2-(Methylamino)-2-Oxoethyl] Ester

Waste Code: P098
Waste Description: Potassium Cyanide (Or) Potassium Cyanide K(Cn)

Waste Code: U044
Waste Description: Chloroform (Or) Methane, Trichloro-

Waste Code: U052
Waste Description: Cresol (Cresylic Acid) (Or) Phenol, Methyl-

Waste Code: U080
Waste Description: Methane, Dichloro- (Or) Methylene Chloride

Waste Code: U122
Waste Description: Formaldehyde

Waste Code: U144
Waste Description: Acetic Acid, Lead(2+) Salt (Or) Lead Acetate

RWQCB Region: SANTA ANA RWQCB (REGION 8)
Site History: Essex Portfolio LP is the owner of a promissory note secured by approximately six acres of property located at 17461 Derian Avenue, Irvine, Orange County. Prior to 1973, the property was undeveloped and consisted of duck ponds with several levees crossing the property. In 1973, Great Lakes Chemical Corporation (GLCC) acquired the property. From 1973 to 1982, GLCC operated an agricultural pesticide packaging and distributing facility on the property. GLCC received chemicals in bulk form from chemical suppliers. Containers (i.e. drums and cylinders) were filled with mixed chemicals for retail sale. Containers were steam cleaned on a concrete pad sloping towards an underground clarifier (located in the southwestern portion of the site). The chemicals used by GLCC to formulate its products included: ethylene dibromide (EDB); chloropicrin; 1,2-dichloropropane (1,2-DCP); 1,3-dichloropropene (1,3-DCP); methylene chloride; methyl bromide; and Chevron 325 (a naphtha based solvent). GLCC sold the property to a real estate developer in 1982, and reacquired the property in 1995 as part of a settlement of certain litigation between GLCC and Great Western Bank. Preliminary site investigations in 1983 indicated that volatile organic compounds (VOCs), including the above listed chemicals, had been discharged to the soil at the property. Between 1983 and 1997, numerous investigations were conducted in order to more fully delineate the extent of contamination present in the soil and groundwater as a result of GLCC's activities at the site. In 1997, the Regional Board issued Cleanup and Abatement Order No. 97-38 to GLCC (Order No. 97-38), requiring full delineation and cleanup of the contamination that is present in soil and groundwater as a result of GLCC's past discharges at the site. In the mid-1990s, GLCC tested a soil vapor extraction (SVE) system at the site, and concluded that an enhanced extraction system could be more effective in removing VOCs from the soil and groundwater. A full-scale soil and groundwater remediation system was installed and started operating in 2000. It consisted of 52 SVE

wells, 50 multiphase extraction (MPE) wells, and 27 off-site groundwater extraction wells. GLCC was acquired by Crompton Corporation, Inc. in 2005. Crompton became Chemtura Corporation in 2005, and GLCC remained a subsidiary of Chemtura. GLCC continued operation of the groundwater remediation system, and carried out the groundwater monitoring and reporting program. Beginning in 2006, GLCCs have periodically modified the groundwater treatment system, to effectively contain and mitigate the offsite migration of the VOCs in groundwater. The groundwater remediation system now consists of 26 groundwater extraction wells, 56 MPE wells and an air stripper. In April 2009, following a pilot test, the off-site extraction wells were turned off. In March 2009, Chemtura and GLCC filed for bankruptcy. Subsequently, the Regional Board, Essex, and GLCC executed a settlement agreement. Essex became solely responsible for remediation activities as set forth in CAO Order No. R8-2011-0013 as of 2011. Order No. 97-38 was rescinded. The remediation system originally consisted of three major components: a SVE system that extracted vapors from 49 on-site SVE points; a MPE system that extracts groundwater and soil vapors from 49 on-site MPE points; and a well network that extracted groundwater through 26 off-site wells fitted with submersible pumps. Because of decreasing concentrations of VOCs in the SVE vapor stream, the SVE system was shut down in December 2003. Because of decreasing concentrations of groundwater contaminants in some areas, some of the MPE points and all of the extraction wells have also been turned off. Remediation is on-going at the site. As on second Q, 2015, approximately 586,000 gallons of groundwater were extracted and treated by the remediation system at the site. Some of the shallow and intermediate monitoring wells and extraction wells (except EW-26 and EW-22) were suspended from monitoring program per the Board's approval presented in the letter dated September 8th, 2014. Also, based on the Board request, Leymaster performed a sampling method comparison to determine if the sampling method (applied historical method using bailer vs low-flow sampling) may be the reason for the concentrations of contaminants in the MPE compared with the monitoring wells. Criteria for significant variance was defined as if the results of the two methods are more than 10% different. In conclusion, the Board requested for future samplings to be performed using low-flow method. Due to application of low-flow purging in MPE wells, bailer will still be used for these wells.

received a Part B permit and went to closure. The facility closed the Interim Status units in 1983. However, the facility never went through a formal closure process. Therefore, in 2000, DTSC conducted administrative review of this site and requested facility to go through the formal closure process. The interim status units were finally clean closed on 6/26/01. For corrective action, soil and groundwater contamination from manufacturing areas has been under jurisdiction of the Waterboard since 1983. Since the WB was responsible for corrective action, little information is available regarding this.

Environmental Interest/Information System:

All generators and treatment, storage, and disposal (TSD) facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years. The data collected is used to create the National Biennial Resource Conservation and Recovery Act (RCRA) Hazardous Waste Report. This data is processed within the RCRA Information (RCRAInfo) database. The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste. The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS), EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), and Toxic Release Inventory (TRI). California's Hazardous Waste Tracking System Data Mart (HWTS-DATAMART) provides information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

Environmental Interest/Information System:

All generators and treatment, storage, and disposal (TSD) facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years. The data collected is used to create the National Biennial Resource Conservation and Recovery Act (RCRA) Hazardous Waste Report. This data is processed within the RCRA Information (RCRAInfo) database

The Toxic Release Inventory System (TRIS) is a publicly available EPA database reported annually by certain covered industry groups, as well as federal facilities. It contains information about more than 650 toxic chemicals that are being used, manufactured, treated, transported, or released into the environment, and includes information about waste management and pollution prevention activities.

The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS), EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), and Toxic Release Inventory (TRI).

The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the

Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste. California's Hazardous Waste Tracking System Data Mart (HWTS-DATAMART) provides information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

Evaluation:

Eval General Type: Compliance Evaluation Inspection
Eval Date: 01-27-2023
Violations Found: No
Eval Type: Routine done by local agency
Eval Notes: Met with Paz Calaci, Payroll, Safety, ISO Manager, and walked through the facility and around the perimeter. Observed that the hazardous materials stored at the site was consistent with what was disclosed in the California Environmental Reporting System (CERS) submittal dated 1/25/23. Facility maintains an emergency plan. Employees are trained.
Eval Division: Orange County Environmental Health
Eval Program: HMRRP
Eval Source: CERS,

Eval General Type: Other/Unknown
Eval Date: 01-28-2020
Violations Found: No
Eval Type: Other, not routine, done by local agency
Eval Notes: Based on a review of the California Environmental Reporting System (CERS) submittal dated 12/27/19, corrected the previous violation. The site is in compliance.
Eval Division: Orange County Environmental Health
Eval Program: HMRRP
Eval Source: CERS,

Eval General Type: Other/Unknown
Eval Date: 02-19-2016
Violations Found: No
Eval Type: Other, not routine, done by local agency
Eval Notes: Paz called for assistance and left message. She cannot locate an update button for her revisions. I returned call and messaged where I believe on her screen she can find the button. I also suggested that

Eval Date: 03-15-2017
Violations Found: No
Eval Type: Routine done by local agency

Eval Notes: On site for a routine hazardous waste inspection. Paz Calaci, safety manager, was present for the inspection and provided consent to inspect. The facility's operations and the waste generated were discussed. The inspection included a walk behind the building. I did not observe hazardous waste in the facility's trash or as run off on the ground. The storage of the shop's hazardous waste was inspected. The storage container was located within a flammable cabinet and labeled. We reviewed the required information to be marked on containers storing hazardous waste, which includes identifying the hazardous property of the waste in storage. The signed off manifests for the removal of the facility's hazardous waste were on site and available for inspection. The records for the last year were reviewed. The facility posted emergency contact numbers and provided their hazardous materials SDS for the employees in the work area. Report PDF to Paz Calaci

Eval Notes: reduced and completed comments for CERS. emailed reports to Paz. From: Krall, Joyce Sent: Thursday, March 23, 2017 8:29 AM To: 'Paz Calaci' <pcalaci@ocpc.com> Subject: HMBEP AND HAZARDOUS WASTE INSPECTIONS Importance: High Hello Paz, It was my pleasure working with you on OCPC's inspections. Attached are the reports. I've identified in CERS what corrections are necessary for OCPC's disclosed inventory to be accepted. 2-27-17 inventory - not accepted. > AQ - satin coating, AQ-matte, AQ - high gloss, AQ - fast dry: SDSs for these materials were reviewed. Each discloses the same hazardous component (1 - 5 % docusate sodium) while their described hazards are different. Each claims undisclosed components as trade secret. Confirm if trade secret and mark the trade secret box if applicable. If claiming proprietary/trade secret information, facility MUST submit the proprietary/trade secret information to this Agency in hard copy format to be kept under lock and [Truncated]

Calaci' Subject: HAZARDOUS MATERIAL DISCLOSURE - OCPC Hello Paz, Thank you for OCPC s electronic disclosure on e-submit. I ve completed its review. There are several revisions requested for its acceptance. Please access e-submit, complete the requested revisions and resubmit. The requested revisions are identified in e-submit and also below: Please revise forms as follows: Hazardous materials inventory: > ABSOLUTE - disclosed as a pure chemical but it appears to be a chemical mixture. Please confirm. The CAS #111-76-2 is for 2-butoxyethanol. If mixture, please complete its hazardous component section. > ABSOLUTE - identify its fed hazard categories. > Aqueous coatings - identify the CAS# for its hazardous component linseed. > Aqueous coatings - identify the %WT and CAS# for its hazardous component ABC. Note: If ABC is less than 1% of the mixture, then no need to list. > Offset ink - [Truncated]

Eval Notes: Met with Paz Calaci, Payroll, Safety, ISO Manager, and walked through the facility and around the perimeter. Observed that some of the hazardous materials stored at the site were not consistent with what was disclosed in the California Environmental Reporting System (CERS) submittal dated 6/3/19. These include: The quantities of the coatings and roller wash were over reported, where 550 gallons was reported for the maximum daily amount - 210 gallons to 110 gallons was instead observed for the various materials. Please review the materials listed and their respective quantities and correct. Add the FR-1000C solvent at a maximum amount of 55 gallons. Within 30 days please correct the inventory. Facility maintains an emergency plan however, some of the important phone numbers were missing. Add to the business emergency plan the OC CUPA (our department) phone number (714-433-6406) and the Regional Water Quality Control Board Phone number (951-782-4130) for the next [Truncated]

Eval Notes: Orange County Environmental Health as the Certified Unified Program Agency (OC CUPA) is the administrating agency for the Hazardous Materials Disclosure and Business Emergency Plan programs (HMD/BEP) previously administered by the Orange County Fire Authority. During the months of August and December of 2013, the OC CUPA sent out letters to regulated businesses requesting them to electronically submit their HMD/BEP forms. Electronic submission of these forms is a legal requirement. Failure to submit HMD/BEP forms is in violation of the California Health & Safety Code Chapter 6.95. According to our records there is no electronic submission for this facility. Please go to www.esubmit.ocgov.com to request a username and password and submit your HMD/BEP forms within the next 30 days. Businesses may also submit forms via the California Environmental Reporting System. Please verify that all owner information that is prepopulated on the E-Submit Portal is still [Truncated]

Violations:

Site ID: 414633
Site Name: PARKER HANNIFIN CORPORATION
Violation Date: 04-30-2018
Citation: 22 CCR 12 66262.34(f) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(f)
Violation Description: Failure to properly label hazardous waste accumulation containers and portable tanks with the following requirements: "Hazardous Waste", name and address of the generator, physical and chemical characteristics of the Hazardous Waste, and starting accumulation date.
Violation Notes: Returned to compliance on 04/30/2018. One drum of waste oil was not labeled, during the inspection this was completed. All hazardous waste containers shall be marked with the following information: 1) the words Hazardous Waste ; 2) name and address of generator; 3) hazardous properties; 4) physical state; 5) composition (contents); 6) accumulation start date. Please make sure to immediately label the containers and ensure that all containers are marked with all the required information. If the containers have been on site longer than 180 days, immediately contact a licensed hazardous waste hauler to dispose of this waste under manifest.

Violation Division: Water Boards
Violation Program: INDSTW
Violation Source: SMARTS,

Site ID: 414633
Site Name: PARKER HANNIFIN CORPORATION
Violation Date: 01-21-2021
Citation: HSC 6.67 25270.4.5 (a) - California Health and Safety Code, Chapter 6.67, Section(s) 25270.4.5 (a)
Violation Description: Failure to amend the SPCC Plan within 6 months: 1. When the facility has had a change in design, construction, operation, or maintenance which affects the facility s discharge potential. AND/OR 2. To include more effective proven technology at the time of the 5-year SPCC Plan review and evaluation.

Violation Notes: Returned to compliance on 03/15/2021. The facility failed to make an amendment for the 55 gallon hydraulic oil AST named Pump Station #187. Correction action: Within 60 days, have a professional engineer certify the technical amendment for the Pump Station #187. Include all required elements in the SPCC plan, tank inventory, and facility diagram. Provide a copy of the plan with the technical amendment to this Agency as documentation.

Eval Notes: George Aguilar of Tankology called to check if a monitor cert is needed for the system. He stated that this site has 3 Ronan monitoring panels with sensors since the tanks cannot be visually inspected. Hi George, Thank you for calling in to ask about the UST or AST at 16666 Von Karman Ave, Irvine, CA 92606. This is what we have listed as part of the ASTs under the SPCC plan as of 2016: If the tanks are part of the SPCC plan, it is likely that they are not underground storage tanks because they must be one or the other. ASTs totaling above 10,000 gallons on-site must be monitored; however, this Agency does not attend AST system testing. USTs are defined as being substantially beneath the surface of the ground, meaning that at least 10% of the underground tank system volume, including the volume of any connected piping, is below the ground surface or enclosed below earthen materials.

Violation Description: Failure to properly label hazardous waste accumulation containers and portable tanks with the following requirements: "Hazardous Waste", name and address of the generator, physical and chemical characteristics of the Hazardous Waste, and starting accumulation date.

Violation Notes: Returned to compliance on 02/17/2021. In the FMU Lab in Building A, a one gallon container of waste Brayco 922 was observed to be missing the accumulation start date. Corrective action: Within 30 days provide documentation, in the form of a photograph, of the one gallon container labeled with the accumulation start date.

Agency (OC CUPA) is the administrating agency for the Hazardous Materials Disclosure and Business Emergency Plan programs (HMD/BEP) previously administered by the Orange County Fire Authority. During the months of August and December of 2013, the OC CUPA sent out letters to regulated businesses requesting them to electronically submit their HMD/BEP forms. Electronic submission of these forms is a legal requirement. Failure to submit HMD/BEP forms is in violation of the California Health & Safety Code Chapter 6.95. According to our records there is no electronic submission for this facility. Please go to www.esubmit.ocgov.com to request a username and password and submit your HMD/BEP forms within the next 30 days. Businesses may also submit forms via the California Environmental Reporting System. Please verify that all owner information that is prepopulated on the E-Submit Portal is still [Truncated]

Eval Notes: George Aguilar of Tankology called to check if a monitor cert is needed for the system. He stated that this site has 3 Ronan monitoring panels with sensors since the tanks cannot be visually inspected. Hi George, Thank you for calling in to ask about the UST or AST at 16666 Von Karman Ave, Irvine, CA 92606. This is what we have listed as part of the ASTs under the SPCC plan as of 2016: If the tanks are part of the SPCC plan, it is likely that they are not underground storage tanks because they must be one or the other. ASTs totaling above 10,000 gallons on-site must be monitored; however, this Agency does

Environmental Interest/Information System:

All generators and treatment, storage, and disposal (TSD) facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years. The data collected is used to create the National Biennial Resource Conservation and Recovery Act (RCRA) Hazardous Waste Report. This data is processed within the RCRA Information (RCRAInfo) database

THE EMISSION INVENTORY SYSTEM (EIS) MAINTAINS AN INVENTORY OF LARGE STATIONARY SOURCES AND VOLUNTARILY-REPORTED SMALLER SOURCES OF AIR POINT POLLUTANT EMITTERS. IT CONTAINS INFORMATION ABOUT FACILITY SITES AND THEIR PHYSICAL LOCATION, EMISSIONS UNITS, EMISSIONS PROCESSES, RELEASE POINTS, CONTROL APPROACHES, AND REGULATIONS. FACILITY INVENTORY DATA ARE KEPT SEPARATE FROM THE EMISSIONS DATA AND HAVE STABLE IDENTIFIERS TO IMPROVE CONTINUITY FROM YEAR TO YEAR AND TO HELP IDENTIFY DUPLICATE OR MISSING FACILITIES

The National Pollutant Discharge Elimination System (NPDES) module of the Integrated Compliance Information System (ICIS). Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

California's Hazardous Waste Tracking System Data Mart (HWTS-DATAMART) provides information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

Environmental Interest/Information System:

The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

The Department of Labor, Occupational Safety and Health Administration information system consists of inspection case detail for approximately 100,000 OSHA inspections conducted annually. The FRS dataset includes facilities that had inspections within the last 7 years within the mining, oil and gas, utilities, and manufacturing sectors.

Eval Notes: On site to conduct a routine hazardous waste inspection. Consent to enter and inspect granted by Scott Murray, Executive Vice President. Facility is a small quantity generator of printing/ink wastes. Walked the facility and perimeter. Inspected the hazardous waste storage area and observed the following waste streams: - Flammable liquids solvent/ink waste (contains acetone and cyclohexanone) - Flammable solids solvent/ink contaminated debris and rags - Non-RCRA empty containers (w/ residues) Containers were closed and properly labeled. Inspected the municipal trash for hazardous waste. No hazardous waste was observed in the dumpster. Manifests for the past three years and emergency response plan were available for review. Last pickup was on 2/22/2023, by Clean Earth Specialty Waste Solutions. Employees are reported to be trained. A copy of this report was emailed to the facility at scott@supercolor.com and kcahill@supercolor.com.

not so much concerned with how much you use in a day, but how much you have stored on site for an average day. For example, say you have three 55 gallon drums of ink, so your largest container size would be 55 gallons, your maximum daily amount would be 165 gallons, and let's say you keep your drums about half full on an average day, so your average daily amount would be around 80 gallons. For you days on site, that would be for the entire year, so if you always have that chemical on site the days on site is usually 365 days. For the mixture components of the ink the CAS# for the ink and or the components within the mixture [Truncated]

Eval Notes:

On site for a routine hazardous waste inspection. Michael Slater, director of operations, was present for the inspection and provided consent to inspect. The facility's operations and the waste generated were discussed. The inspection included a walk behind the building. I did not observe hazardous waste in the facility's trash or as run off on the ground. The outside storage of the shop's hazardous waste, including universal waste, was inspected. The storage containers were stored closed and labeled with the required information. Mr. Slater requested that I return at a later date to complete the facility's hazardous waste generator document review, so that their environmental representative could participate. I concurred. Returned to the facility on 10-2-17. Inspection was completed with Robb Woolwine, Q & EHS representative. The storage of the shop's hazardous waste, including the work areas hazardous waste satellite storage, was inspected. We reviewed [Truncated]

Eval Notes:

On site to conduct a routine hazardous materials chemical inventory and business emergency plan (HMBP) inspection. Robb Woolwine, Q & EHS representative, was present for the inspection and provided consent to inspect. The inspection was to confirm the facility's electronic hazardous materials disclosure and business plan. We reviewed the facility's Hazardous material inventory on site. We reviewed the locations of the required items to be mapped. We discussed the facility's use of CERS (California Environmental Reporting System) for their electronic HMBP submissions. Inspection found revisions to the facility's HMBEP submission necessary for accuracy. Improvements to the facility's site map were discussed. Revisions will be requested via CERS. Facility reported to conduct annual employee safety procedure training in the event of a release or a threatened release of hazardous material and will begin keeping records of topics covered and employees trained. Eval Type: Other, not routine, done by local agency

Eval Notes: On-site to follow up on previous violations cited on 9/22/17, related to the handling and storage of satellite waste storage containers. Was escorted to the hazardous waste storage area, some of the waste containers were missing accumulation dates or the hazardous waste labels had fallen off onto the ground. I provided the business with hazardous waste labels, observed the business representative add the accumulation dates to the necessary labels, and re-adhere the hazardous waste labels onto the containers. No violation will be cited - corrected on-site. Met with Mr. Woolwine and walked through the work areas. Observed the satellite hazardous waste storage containers throughout the work area. Some of the containers were missing labels and were identical to the containers being used for regular trash. I suggested using two different types of containers to avoid confusion about what is hazardous waste and what is regular trash. The business stated the were [Truncated]

Eval Type: Other, not routine, done by local agency
Eval Notes: Orange County Environmental Health as the Certified Unified Program Agency (OC CUPA) is the administrating agency for the Hazardous Materials Disclosure and Business Emergency Plan programs (HMD/BEP) previously administered by the Orange County Fire Authority. During the months of August and December of 2013, the OC CUPA sent out letters to regulated businesses requesting them to electronically submit their HMD/BEP forms. Electronic submission of these forms is a legal requirement. Failure to submit HMD/BEP forms is in violation of the California Health & Safety Code Chapter 6.95. According to our records there is no electronic submission for this facility. Please go to www.esubmit.ocgov.com to request a username and password and submit your HMD/BEP forms within the next 30 days. Businesses may also submit forms via the California Environmental Reporting System. Please verify that all owner information that is prepopulated on the E-Submit Portal is still [Truncated]

Environmental Interest/Information System:

The Toxic Release Inventory System (TRIS) is a publicly available EPA database reported annually by certain covered industry groups, as well as federal facilities. It contains information about more than 650 toxic chemicals that are being used, manufactured, treated, transported, or released into the environment, and includes information about waste management and pollution prevention activities.

The National Pollutant Discharge Elimination System (NPDES) module of the Integrated Compliance Information System (ICIS). Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

California's Hazardous Waste Tracking System Data Mart (HWTS-DATAMART) provides information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

Treat To Water: Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.

Complexity: Category C - Facilities having no waste treatment systems, such as cooling water dischargers or those who must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

 Eval Date: 08-17-2017
 Violations Found: No
 Eval Type: Routine done by local agency

Eval Notes: ROYAL ADHESIVES AND SEALANTS DBA BACON ADHESIVES 16731 HALE AVE IRVINE 92606 On site for a change in business ownership hazardous waste inspection. Juan Cuevas, operations manager, was present for the inspection and provided consent to inspect. The new business owner was identified as Royal Adhesives and Sealants. The facility's operations and the waste generated were discussed. The inspection included a walk around the building. I did not observe hazardous waste in the facility's trash or as run off on the ground. The storage of the shop's hazardous waste, including universal waste, was inspected. We reviewed the required information to be marked on containers storing hazardous waste, and the designated collection areas which were accumulating various small containers of hazardous waste pending lab packing. The signed off manifests for the removal of the facility's hazardous waste were on site and available for inspection. The receipts for the removal of [Truncated]

Eval Division: Orange County Environmental Health
 Eval Program: HW
 Eval Source: CERS,

Eval General Type: Other/Unknown
 Eval Date: 09-29-2020
 Violations Found: No
 Eval Type: Other, not routine, done by local agency

Eval Notes: Photographs showing the 1 gallon containers of waste methanol located in the chemistry lab locker were reviewed by this Agency and observed to be properly labeled as Hazardous Waste. Violation I400 was observed to be corrected, no further corrective action required. A copy of this report was sent to eunice.familoni@hbfuller.com.

Eval Notes: SUPER COLOR DIGITAL LLC 16721 HALE IRVINE 92606 On site to conduct a new facility hazardous materials chemical inventory and business emergency plan (HMBP) inspection. Robb Woolwine, Q & EHS representative, was present for the inspection and provided consent to inspect. We reviewed the facility's Hazardous material inventory on site. Propane (est. 21 gallons), argon compressed gas (est. 2,800 cu ft), were present on site above each material's respective reporting threshold. Also, oxygen compressed gas and acetylene may also be present above each material's respective reporting threshold. The reporting threshold for oxygen and for acetylene is at 200 cu ft each. We reviewed the locations of the required items to be mapped. We discussed the facility's use of CERS (California Environmental Reporting System) for their electronic HMBP submissions. Facility reported to conduct annual employee safety procedure training in the

Eval Notes: Orange County Environmental Health as the Certified Unified Program Agency (OC CUPA) is the administrating agency for the Hazardous Materials Disclosure and Business Emergency Plan programs (HMD/BEP) previously administered by the Orange County Fire Authority. During the months of August and December of 2013, the OC CUPA sent out letters to regulated businesses requesting them to electronically submit their HMD/BEP forms. Electronic submission of these forms is a legal requirement. Failure to submit HMD/BEP forms is in violation of the California Health & Safety Code Chapter 6.95. According to our records there is no electronic submission for this facility. Please go to www.esubmit.ocgov.com to request a username and password and submit your HMD/BEP forms within the next 30 days. Businesses may also submit forms via the California Environmental Reporting System. Please verify that all owner information that is prepopulated on the E-Submit Portal is still [Truncated]

Eval Notes: HMBEP declined. The following notes were included in the review: "Complete all asterisked fields in the business owner operator section. Provide CAS# s with correct formatting (dashes in the right places) For each material, provide a value for maximum daily amount that is greater than or equal to the quantity of the largest container. Maximum daily amount refers to the maximum capacity that you have for each material. For coolant and transmission oil entries, remove the annual waste amount from the pure materials. For the waste entries, indicate that they are waste in the common name (i.e. waste coolant). Remove the annual waste amount from the motor oil entry since it is listed as a pure material. If you also generate waste motor oil that is not included in the waste transmission oil entry, create a separate entry for the waste and include both an annual waste amount and state waste code. Describe the location of other records in the emergency plan [Truncated]

[Click Here for FRS Facility Detail Report:](#)

Environmental Interest/Information System:

The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS), EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), and Toxic Release Inventory (TRI).

The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Address: 16692 HALE AVE STE A
City,State,Zip: IRVINE, CA 92606
Site ID: 372802
CERS ID: 10565191
CERS Description: Chemical Storage Facilities

Violations:

Site ID: 372802
Site Name: SPECTRUM SCIENTIFIC INC
Violation Date: 02-17-2016
Citation: 22 CCR 12 66262.40(c) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.40(c)
Violation Description: Failure to determine if the waste generated is a hazardous waste and to maintain analysis results for three years.
Violation Notes: Returned to compliance on 02/19/2016. Hazardous waste determination was not conducted for the waste machine coolant. Please perform a hazardous waste determination on this waste stream. Waste machine coolant mixed with oil is considered hazardous waste until proven otherwise. Violation must be corrected immediately. Spoke with Mr. David O Connor via telephone on 2/19/2016. Mr. O Conner stated that Spectrum Scientific will be treating the waste machine coolant as hazardous waste immediately and will maintain manifests was required. Violation I325 has been abated.

Eval General Type: Other/Unknown
Eval Date: 03-04-2019
Violations Found: No
Eval Type: Other, not routine, done by local agency
Eval Notes:

Based on a review of the California Environmental Reporting System (CERS) Website, this business has failed to submit for 2018 and 2019. Annual certification of CERS information is due between January 1 and March 1 each year. Please resubmit on CERS: Every year between January 1 and March 1, AND Within 30 days of change of ownerships, changes in chemical quantities of over 100%, or any new chemicals above the reporting threshold. Hazardous materials must be reported if the business handles an amount equal to or greater than 55 gallons of liquid, 500 pounds of solid, or 200 cubic feet of compressed gas (1,000 cubic feet threshold for medical gases or gases for which the only health/physical hazards are simple asphyxiation and the release of pressure). As a result, violations have been cited against the facility. If you would like assistance, please email myself at this address and arrange an appointment. Continued failure to submit will result in [Truncated]

Eval Division: Orange County Environmental Health
Eval Program: HMRRP
Eval Source: CERS,

Eval General Type: Compliance Evaluation Inspection
Eval Date: 03-19-2019
Violations Found: No
Eval Type: Routine done by local agency
Eval Notes:

Walked through the facility and around the perimeter. Checked trash cans throughout the site. Observed the following hazardous waste: - 5-gallons expired/off-spec materials including epoxy - 5-gallon bucket used oil from machines - (1) box E-waste The site is not a yearly generator of hazardous wastes. The last manifests were dated 9/2015 and 4/2017. Very small quantities of resins and off spec materials are generated and disposed of every 2 to 3 years. Coolant from the machines is removed as waste about every 2-3 years as well. The site should be placed as Stat 03 and should be followed up with in 2020/2021 to confirm status. Reviewed manifest and observed that the Business Emergency Plan was stored at the site and available for employees.

Eval Notes: I returned David's call. On CERS he has a 9-27-17 submission pending review. I lft msg I will be reviewing it in the next several weeks.

Eval Division: Orange County Environmental Health
Eval Program: HMRRP
Eval Source: CERS,

Eval General Type: Compliance Evaluation Inspection
Eval Date: 02-17-2016
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: INSPECTOR COMMENT: On site for a routine hazardous waste inspection. Consent to inspect and take any necessary photos was given by Stacy Truong, Office Manager, and Brian Ruth, Coding Technician. Walked throughout the facility. Observed hazardous waste storage areas. Containers were closed and properly labeled. Manifests were available and reviewed. Employees are reported to be trained. Emergency plan is posted in the production area. No hazardous or universal wastes observed in the dumpster/enclosure area. A waste determination was not conducted for the waste machine coolant from CNC machine activities. Facility has been improperly disposing of the waste coolant into the environment. Discussed hazardous waste determination with Mr. Ruth and Ms. Truong during the inspection and with Mr. David O Connor, Facility Manager, via telephone after the inspection. Requested a hazardous waste determination be performed for this waste stream.

Environmental Interest/Information System:

The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

[Click this hyperlink](#) while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

inspect and take photos if necessary was granted by the assistant manager, Terry Nelson. No hazardous waste was observed in the trash compactor on this date, and no photos were taken. The following were observed: 5 x 5-gallon buckets, black- toxic 5 x 5-gallon buckets, red- flammable liquid 5-gallon bucket, yellow- reactive 25-gallon drum, blue- aerosols The pharmacy manager, Alvin Vu provided access to the following: 13-gallon receptacle for pharmaceutical waste All hazardous waste containers were observed properly stored and labeled. Hazardous waste disposal documents were reviewed. No hazardous waste violations were observed on this date. A copy of this report will be sent to helen.bermudez@walmart.com

Eval Division: Orange County Environmental Health
Eval Program: HW
Eval Source: CERS,

Eval General Type: Compliance Evaluation Inspection
Eval Date: 02-09-2022
Violations Found: No
Eval Type: Routine done by local agency
Eval Notes:

On site to conduct a routine hazardous materials inspection. Walked throughout the facility and inspected hazardous materials storage areas. The following hazardous materials were observed in amounts that exceed the required disclosure quantities: - 123-gal (5 X 5-gal + 14 X 7-gal) Propane - 3,068 cu.ft. R-407A Refrigerant - 18 Waste Lead Acid Batteries - 80 New Lead Acid Batteries - Universal Wastes - Pharmaceutical Wastes (in a 70-gal plastic container) - Non-RCRA Consumer Products (in multiple 5-gal plastic containers) The facility is responsible for identifying all hazardous materials, including hazardous wastes, whose quantities exceed the disclosure thresholds (55 gallons liquid, 500 lbs solid, 200 cu.ft. gas). If there is a change in the type or 100% increase in the amount of chemicals that are maintained on site, update the Hazardous Materials Inventory section of your Hazardous Materials Business Plan (HMBP) and resubmit within 30 days of [Truncated]

Environmental Interest/Information System:

The California Environmental Reporting System (CERS) is a statewide web-based user and information exchange system to support over 140,000 regulated businesses and over 130 local agencies in electronically collecting and reporting significant hazardous materials, hazardous waste and compliance and enforcement data as mandated by California law. Under oversight by Cal/EPA, certified local governing agencies (Unified Program Agencies - UPAs) consolidate, coordinate and provide consistent regulatory activities for six state and federal environmental programs.

The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS), EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), and Toxic Release Inventory (TRI).

Registry ID: 110001133390

[Click Here for FRS Facility Detail Report:](#)

Environmental Interest/Information System:

THE EMISSION INVENTORY SYSTEM (EIS) MAINTAINS AN INVENTORY OF LARGE STATIONARY SOURCES AND VOLUNTARILY-REPORTED SMALLER SOURCES OF AIR POINT POLLUTANT EMITTERS. IT CONTAINS INFORMATION ABOUT FACILITY SITES AND THEIR PHYSICAL LOCATION, EMISSIONS UNITS, EMISSIONS PROCESSES, RELEASE POINTS, CONTROL APPROACHES, AND REGULATIONS. FACILITY INVENTORY DATA ARE KEPT SEPARATE FROM THE EMISSIONS DATA AND HAVE

STABLE IDENTIFIERS TO IMPROVE CONTINUITY FROM YEAR TO YEAR AND TO HELP IDENTIFY DUPLICATE OR MISSING FACILITIES

The Toxic Release Inventory System (TRIS) is a publicly available EPA database reported annually by certain covered industry groups, as well as federal facilities. It contains information about more than 650 toxic chemicals that are being used, manufactured, treated, transported, or released into the environment, and includes information about waste management and pollution prevention activities.

The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Environmental Interest/Information System:
 The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Hazardous Waste Summary:

Waste Code: D000

Waste Description: Not Defined

Waste Code: D001

Waste Description: Ignitable Waste

Waste Code: D002

Waste Description: Corrosive Waste

Waste Code: D003

Waste Description: Reactive Waste

Waste Code: D005

Waste Description: Barium

Waste Code: D006

Waste Description: Cadmium

Waste Code: D007

Waste Description: Chromium

Waste Code: D008

Waste Description: Lead

Waste Code: D009

Waste Description: Mercury

Waste Code: D011

Waste Description: Silver

Waste Code: D039

Waste Description: Tetrachloroethylene

Waste Code: D040

Waste Description: Trichlorethylene

Waste Code: F003

Waste Description: The Following Spent Nonhalogenated Solvents: Xylene, Acetone, Ethyl Acetate, Ethyl Benzene, Ethyl Ether, Methyl Isobutyl Ketone, N-Butyl Alcohol, Cyclohexanone, And Methanol; All Spent Solvent Mixtures/Blends Containing, Before Use, Only The Above Spent Nonhalogenated Solvents; And All Spent Solvent Mixtures/Blends Containing, Before Use, One Or More Of The Above Nonhalogenated Solvents, And A Total Of Ten Percent Or More (By Volume) Of One Or

More Of Those Solvents Listed In F001, F002, F004, And F005; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.

Waste Code: F005
Waste Description: The Following Spent Nonhalogenated Solvents: Toluene, Methyl Ethyl Ketone, Carbon Disulfide, Isobutanol, Pyridine, Benzene, 2-Ethoxyethanol, And 2-Nitropropane; All Spent Solvent Mixtures/Blends Containing, Before Use, A Total Of Ten Percent Or More (By Volume) Of One Or More Of The Above Nonhalogenated Solvents Or Those Solvents Listed In F001, F002, Or F004; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.

Waste Code: F006
Waste Description: Wastewater Treatment Sludges From Electroplating Operations, Except From The Following Processes: (1) Sulfuric Acid Anodizing Of Aluminum; (2) Tin Plating On Carbon Steel; (3) Zinc Plating (Segregated Basis) On Carbon Steel; (4) Aluminum Or Zinc-Aluminum Plating On Carbon Steel; (5) Cleaning/Stripping Associated With Tin, Zinc, And Aluminum Plating On Carbon Steel; And (6) Chemical Etching And Milling Of Aluminum.

Waste Code: P030
Waste Description: Cyanides (Soluble Cyanide Salts), Not Otherwise Specified

Waste Code: P098
Waste Description: Potassium Cyanide (Or) Potassium Cyanide K(Cn)

Waste Code: P104
Waste Description: Silver Cyanide (Or) Silver Cyanide Ag(Cn)

Waste Code: P106
Waste Description: Sodium Cyanide (Or) Sodium Cyanide Na(Cn)

Waste Code: U080
Waste Description: Methane, Dichloro- (Or) Methylene Chloride

Waste Code: U112
Waste Description: Acetic Acid, Ethyl Ester (I) (Or) Ethyl Acetate (I)

Waste Code: U122
Waste Description: Formaldehyde

Waste Code: U123
Waste Description: Formic Acid (C,T)

Waste Code: U133
Waste Description: Hydrazine (R,T)

Waste Code: U154
Waste Description: Methanol (I) (Or) Methyl Alcohol (I)

Waste Code: U159
Waste Description: 2-Butanone (I,T) (Or) Methyl Ethyl Ketone (Mek) (I,T)

Waste Code: U188
Waste Description: Phenol

Environmental Interest/Information System:

All generators and treatment, storage, and disposal (TSD) facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years. The data collected is used to create the National Biennial Resource Conservation and Recovery Act (RCRA) Hazardous Waste Report. This data is processed within the RCRA Information (RCRAInfo) database

THE EMISSION INVENTORY SYSTEM (EIS) MAINTAINS AN INVENTORY OF LARGE STATIONARY SOURCES AND VOLUNTARILY-REPORTED SMALLER SOURCES OF AIR POINT POLLUTANT EMITTERS. IT CONTAINS INFORMATION ABOUT FACILITY SITES AND THEIR PHYSICAL LOCATION, EMISSIONS UNITS, EMISSIONS PROCESSES, RELEASE POINTS, CONTROL APPROACHES, AND REGULATIONS. FACILITY INVENTORY DATA ARE KEPT SEPARATE FROM THE EMISSIONS DATA AND HAVE STABLE IDENTIFIERS TO IMPROVE CONTINUITY FROM YEAR TO YEAR AND TO HELP IDENTIFY DUPLICATE OR MISSING FACILITIES

The Toxic Release Inventory System (TRIS) is a publicly available EPA database reported annually by certain covered industry groups, as well as federal facilities. It contains information about more than 650 toxic chemicals that are being used, manufactured, treated, transported, or released into the environment, and includes information about waste management and pollution prevention activities.

The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Environmental Interest/Information System:

The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS), EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), and Toxic Release Inventory (TRI).

Name: SALLY BEAUTY SUPPLY #10288
 Address: 16585 VON KARMAN # 20-2 E
 City,State,Zip: IRVINE, CA 92606
 Site ID: 367504
 CERS ID: 10665403
 CERS Description: Hazardous Waste Generator

Evaluation:

Eval General Type: Compliance Evaluation Inspection
 Eval Date: 02-20-2020
 Violations Found: No
 Eval Type: Routine done by local agency
 Eval Notes:

Walked the facility with Michaelyn Bellamy, Sales Associate. Verified ownership as Sally Beauty Holdings LLC. The facility is a Very Small Quantity Hazardous Waste Generator with waste streams from damaged or returned beauty products. Inspected the hazardous waste storage area, the perimeter and the municipal trash. No hazardous materials were observed in the municipal trash. Hazardous waste containers were observed to be in good condition, stored closed, and were properly labeled. Hazardous waste manifests were reviewed from the previous three years. Employees were reported to be trained. Weekly inspection logs for the hazardous waste containers were observed. The emergency response phone numbers were observed in the office. A copy of this report was sent to aprado@sallybeauty.com.

Eval Division: Orange County Environmental Health
 Eval Program: HW
 Eval Source: CERS,

Eval General Type: Compliance Evaluation Inspection
 Eval Date: 03-25-2022
 Violations Found: No
 Eval Type: Routine done by local agency
 Eval Notes:

On site to conduct a routine hazardous waste inspection. Walked throughout the facility and inspected hazardous waste storage areas. The facility is a small quantity generator of the following hazardous wastes (stored in 5-gal plastic totes with lid): - Corrosive Acids - Corrosive Bases - Oxidizers - Non-RCRA Toxic Waste - Aerosol/Flammable/Combustibles - Universal Wastes (contains Mercury)

Eval Notes: Met with Susan Gonzales, EHS Specialist, and walked through the facility and around the perimeter. Observed that the hazardous materials inventory was consistent with what was disclosed in the California Environmental Reporting System (CERS) submittal dated 2/25/19, with the exception of: 1. The wastes should only be listed under the 16666 Von Karman Ave. address since the wastes are stored there. 2. If oils/coolant is stored in the machines please make sure the quantities listed in CERS reflects these amounts. 3. IPA, 3, 55 - gallons were observed to have been stored on-site Please update the CERS submittal to reflect the above observations. Employee's are trained and are aware of the Business Emergency Plan.

Hazardous Waste Summary:

Waste Code:	D001
Waste Description:	Ignitable Waste
Waste Code:	D002
Waste Description:	Corrosive Waste
Waste Code:	D003
Waste Description:	Reactive Waste
Waste Code:	D006
Waste Description:	Cadmium
Waste Code:	D008
Waste Description:	Lead
Waste Code:	D011
Waste Description:	Silver
Waste Code:	F003
Waste Description:	The Following Spent Nonhalogenated Solvents: Xylene, Acetone, Ethyl Acetate, Ethyl Benzene, Ethyl Ether, Methyl Isobutyl Ketone, N-Butyl Alcohol, Cyclohexanone, And Methanol; All Spent Solvent Mixtures/Blends Containing, Before Use, Only The Above Spent Nonhalogenated Solvents; And All Spent Solvent Mixtures/Blends Containing, Before Use, One Or More Of The Above Nonhalogenated Solvents, And A Total Of Ten Percent Or More (By Volume) Of One Or More Of Those Solvents Listed In F001, F002, F004, And F005; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.
Waste Code:	F006
Waste Description:	Wastewater Treatment Sludges From Electroplating Operations, Except From The Following Processes: (1) Sulfuric Acid Anodizing Of Aluminum; (2) Tin Plating On Carbon Steel; (3) Zinc Plating (Segregated Basis) On Carbon Steel; (4) Aluminum Or Zinc-Aluminum Plating On Carbon Steel; (5) Cleaning/Stripping Associated With Tin, Zinc, And Aluminum Plating On Carbon Steel; And (6) Chemical Etching And Milling Of Aluminum.
Waste Code:	F007
Waste Description:	Spent Cyanide Plating Bath Solutions From Electroplating Operations.
Waste Code:	F032
Waste Description:	Wastewaters, Process Residuals, Preservative Drippage, And Spent Formulations From Wood Preserving Processes Generated At Plants That Currently Use, Or Have Previously Used, Chlorophenolic Formulations [Except Potentially Cross-Contaminated Wastes That Have Had The F032 Waste Code Deleted In Accordance With Section 261.35 (I.E., The Newly Promulgated Equipment Cleaning Or Replacement Standards), And Where The Generator Does Not Resume Or Initiate Use Of Chlorophenolic Formulations]. (This Listing Does Not Include K001 Bottom Sediment Sludge From The Treatment Of Wastewater From Wood Preserving Processes That Use Creosote And/Or Pentachlorophenol.)

Environmental Interest/Information System:

All generators and treatment, storage, and disposal (TSD) facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years. The data collected is used to create the National Biennial Resource Conservation and Recovery Act (RCRA) Hazardous Waste Report. This data is processed within the RCRA Information (RCRAInfo) database

The Toxic Release Inventory System (TRIS) is a publicly available EPA database reported annually by certain covered industry groups, as well as federal facilities. It contains information about more than 650 toxic chemicals that are being used, manufactured, treated, transported, or released into the environment, and includes information about waste management and pollution prevention activities.

The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

California's Hazardous Waste Tracking System Data Mart (HWTS-DATAMART) provides information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

 Quarterly Update: Delphi Connection system, also known as Hughes Aircraft engaged in manufacturing of interconnection products for aerospace and military industries. The facility obtained a ISD on 4/6/81. Subsequently, the facility recieved an operating (part B) permit on 6/28/85. After permit expired on 6/28/90, facility decided to close the hazardous waste units and operate as generator only status. The facility was verified closed on 6/11/94. For corrective action, there was an PA conducted on 05/08/90. There were no additional corrective action information found in files.

Treat To Water: Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity: Category C - Facilities having no waste treatment systems, such as cooling water dischargers or those who must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.
