## E-vehicle Registration and Education

With the growing popularity of e-vehicles (e-bikes, e-scooters and e-skateboards) among students in school districts throughout Orange County, it is paramount that future laws and ordinances govern the classifications, age use, registration, and education for e-vehicles. The Irvine Unified School District has implemented the following measures to help support the safe and responsible use of these devices in partnership with the Irvine Police Department (IPD).

### Attendance

All middle and high school students who ride e-vehicles to school must attend an IPD-led safety presentation each fall. Middle school parents and guardians are required to attend. Parent support is key to student safety.

### Registration & Permits

After attending, students and parents must submit a registration form. Approved students receive a permit to park on campus — e-vehicles without a permit are not allowed.

Come learn more from the Irvine Police Department on the program and where it is heading in the future to help making biking safer for all riders.
