

Harvard Safety Improvements Project Update | Fact Sheet

The City of Irvine, in partnership with the City of Tustin, is leading the Harvard Safety Improvements Project to enhance safety, accessibility, and mobility along Harvard Avenue between Irvine Center Drive and Walnut Avenue. Located in a residential area near parks and trail systems, the project will improve circulation and expand transportation options for cyclists and pedestrians.

Project Benefits

- Traffic calming measures to reduce speeding and enhance safety for all users
- Upgraded pedestrian infrastructure, including crosswalks and sidewalks
- New bike lanes to support safe, active transportation
- Railroad crossing improvements for better pedestrian and vehicle flow
- Expanded trail connections to promote recreation and non-motorized travel

Primary project focus area: approximately ¼ mile from the project corridor

Project Timeline

- **Summer 2025** — Develop preliminary alternative designs
- **Fall 2025** — Gather community input on alternatives
- **Winter 2025** — Select preferred alternative and begin environmental clearance
- **Spring 2026** — Begin final engineering design
- **Spring 2027** — Begin construction

Get Involved

Community participation is key to the success of this project.

- Attend the Community Workshop on Tuesday, September 23, from 5–7 p.m. at Harvard Community Center
- Follow the City of Irvine on social media for updates and event announcements
